THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 3

Chapter 12: **Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Planaria can regenerate lost parts. This is called: 1

(a) regeneration **(b)** pollination **(c)** fertilisation **(d)** budding

2. Pollination within the same flower is: 1

(a) self-pollination **(b)** germination

(c) cross-pollination **(d)** fertilisation

3. Internal fertilisation occurs in: 1

(a) starfish **(b)** frog **(c)** fish **(d)** humans and birds

4. The duration of the menstrual cycle is usually about: 1

(a) 7 days **(b)** 28 days **(c)** 40 days **(d)** 14 days

5. Potato reproduces vegetatively by its: 1

(a) seeds **(b)** tubers (eyes) **(c)** spores **(d)** fruits

6. Pollination between different flowers of different plants of the same species is: 1

(a) cross-pollination **(b)** budding

(c) fertilisation **(d)** self-pollination

7. Humans have ___ pairs of chromosomes. 1

(a) 24 **(b)** 22 **(c)** 23 **(d)** 46

8. Menstruation takes place when: 1

(a) the egg is fertilised **(b)** the sperm is released

(c) the baby is born **(d)** the egg is not fertilised

9. Rose and sugarcane are propagated by: 1

(a) leaves only **(b)** seeds **(c)** spores **(d)** stem cuttings

10. Flowers pollinated by insects are generally: 1

(a) without petals **(b)** without nectar

(c) small and dull **(d)** bright coloured and fragrant

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. What is vegetative propagation? Name two methods. 2

12. Name the male and female gametes in humans. 2

13. Differentiate between pollination and fertilisation. 2

14. What is the role of the placenta? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. List three differences between asexual and sexual reproduction. 3

16. Explain the menstrual cycle in brief. 3

17. State three differences between a spore and a seed. 3

OR

State three methods of artificial vegetative propagation with examples. 3

18. Explain how the embryo is protected and nourished in the uterus. 3

OR

Explain why the sperms are produced in large numbers but ova in small numbers. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the fertilisation, implantation, development and birth of a human baby. 5

OR

Explain the reproduction in frogs and hens with the type of fertilisation, the life cycle and the care of the young. 5

20. Explain the menstrual cycle with the changes in the ovary and the uterus. 5

OR

Explain the population problem, its causes and the measures to control it with their importance for health and development. 5

END OF QUESTION PAPER — Total: 40 Marks
