THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 12: **Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The number of sperms produced from one primary spermatocyte is: 1

(a) 2 **(b)** 4 **(c)** 8 **(d)** 1

2. The 'copper-T' prevents: 1

(a) menstruation **(b)** ovulation only
(c) implantation of the embryo **(d)** sperm formation

3. A pair of Hydra shows buds that are: 1

(a) outgrowths that detach **(b)** eggs
(c) spores **(d)** gametes

4. The pollen tube grows through the: 1

(a) sepal **(b)** filament **(c)** style **(d)** petal

5. The number of ova produced from one primary oocyte is: 1

(a) 4 **(b)** 8 **(c)** 1 **(d)** 2

6. A tubectomy is the surgical procedure for: 1

(a) plants **(b)** females **(c)** both **(d)** males

7. A fragment of Spirogyra grows into a new filament by: 1

(a) spore formation **(b)** fission **(c)** fragmentation **(d)** budding

8. Double fertilisation is characteristic of: 1

(a) mosses **(b)** ferns **(c)** gymnosperms **(d)** angiosperms

9. The structure that carries sperms from the testis to the urethra is the: 1

(a) epididymis only **(b)** vas deferens **(c)** oviduct **(d)** ureter

10. The disease transmitted through unprotected sex is: 1

(a) malaria **(b)** AIDS **(c)** dengue **(d)** typhoid

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. State the role of the pollen tube in fertilisation. 2

12. Why do we say that the sex of the baby is determined by the father? 2

13. Why is the number of sperms much greater than the number of ova? 2

14. What are the advantages of internal fertilisation over external fertilisation? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. A farmer wants to propagate a mango variety with good fruit. Which method will he use and why? 3

16. State the changes taking place at puberty in boys and girls. 3

17. Explain the role of the ovary and testes as endocrine as well as reproductive organs. 3

OR

State three differences between mitosis (asexual) and meiosis (gamete formation) in terms of the offspring. 3

18. How do the hormones control the menstrual cycle and pregnancy? 3

OR

Explain how an egg of a hen develops into a chick with the structures of the egg. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain the structure of a flower with the help of a diagram described in words and name the parts of the stamen and carpel. 5

OR

Explain the role of fertilisation, meiosis and the mixing of genes in giving rise to variation, and its importance for evolution. 5

20. Describe the adaptation for pollination in flowers pollinated by wind, insects, birds and water with examples. 5

OR

Explain the problems of overpopulation and the role of the family planning programme, with the importance of a small family. 5

END OF QUESTION PAPER Total: 40 Marks
