THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SOCIAL SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 4: **Atmosphere and Climate (Geography)** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Why does a sea breeze cool coastal cities in the afternoon? 1

(a) Cooler air from the sea moves in to replace rising warm air over land
(b) Heavy rain falls every afternoon
(c) Hot air from the desert moves to the coast
(d) Cold air from land moves out to sea

2. Himalayan states have autumn and spring besides the four IMD seasons because 1

(a) they receive no monsoon **(b)** altitude changes the local climate
(c) they are coastal **(d)** they lack rain

3. Kalidasa's Meghadutam (about 5th century CE) is important for the study of climate because it 1

(a) mentions the onset of the monsoon over central India
(b) describes the greenhouse effect
(c) measures air pressure
(d) records the first aurora seen in Norway

4. The monsoon is described as a seasonal 1

(a) change in rivers **(b)** reversal of winds
(c) shift in tides **(d)** melting of snow

5. Cutting forests adds to atmospheric CO2 because 1

(a) trees reflect heat **(b)** fewer trees remain to absorb it
(c) trees stop the monsoon **(d)** trees produce nitrogen

6. A mountaineer finds the air thin at 6,000 m because 1

(a) gravity is zero there
(b) oxygen turns into nitrogen at height
(c) temperature is always 0 C
(d) air pressure and density fall with height

7. A shower of hail is an example of 1

(a) humidity **(b)** precipitation **(c)** insolation **(d)** pressure

8. A town says 'It rained today; over 30 years June-September is always heavy rain.' The first statement is about weather; the second is about 1

(a) precipitation **(b)** climate **(c)** weather **(d)** insolation

9. Why does the north-east monsoon give rain to Tamil Nadu? 1

(a) Winds cross the Western Ghats from the Arabian Sea
(b) Winds descend dry from the Himalaya
(c) Winds blow from the Thar desert
(d) Winds pick up moisture over the Bay of Bengal before reaching it

10. Which suggests a rise in sea level? 1

(a) Increase in forests **(b)** More rainfall in desert
(c) Melting glaciers **(d)** Cooling climate

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is the air pressure highest at sea level? 2

12. Why is traditional rain-prediction using nakshatra still useful? 2

13. How can desilting help? 2

14. Why is the stratosphere ideal for aircraft? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. What are the effects of moisture and pressure on weather? 3

16. Explain how temperature changes through the five layers. 3

17. Explain with reasons why aeroplanes fly in the stratosphere and not the troposphere. 3

OR

Explain three personal actions to reduce carbon footprint. 3

18. Explain how an aurora forms. 3

OR

Explain the effects of the Punjab floods. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain the Punjab floods as a case study of natural and human factors. 5

OR

Explain monsoon forecasting in India. 5

20. Explain the sea breeze and land breeze and their effect on coasts. 5

OR

Compare weather and climate with elements and examples. 5

END OF QUESTION PAPER — Total: 40 Marks
