ANSWER KEY & MARKING SCHEME SET 1

Chapters 6–9: **Resources and Development (Geography), Forest and Wildlife Resources (Geography), Water Resources (Geography), Agriculture (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(a)** stock	Water is an example (H2 and O2)
2	**(b)** local communities in protecting forests	Participation
3	**(d)** Meghalaya	200-year-old
4	**(b)** winter	October to December
5	**(b)** Rocks	Non-living
6	**(a)** International Union for Conservation of Nature	Red Data Book
7	**(a)** flowing water that restrains and stores it	Controls flow
8	**(a)** Kharif crop	Oilseed
9	**(c)** community-owned resources	Community
10	**(a)** 8%	47,000 plant species and 81,000 faunal species
11	**(b)** Mahanadi	Odisha
12	**(d)** Andhra Pradesh	Local names
13	**(a)** rivers	Indus, Ganga, Brahmaputra
14	**(a)** habitat destruction	Human pressure
15	**(c)** a small share	Accessible water

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	On the basis of exhaustibility, resources are renewable (solar and wind energy, water, forests) (1); and non-renewable (minerals and fossil fuels, which take millions of years to form) (1).	1+1
17	Protected forests are protected from further depletion (1); They form almost one-third of the total forest area (1).	1+1
18	The hydrological cycle is the continuous circulation of water between oceans, atmosphere and land (1); It includes evaporation, condensation, precipitation and run-off (1).	1+1
19	Bhoodan was a movement led by Vinoba Bhave in which landlords were asked to donate land to the landless (1); It started at Pochampalli in 1951, and Gramdan meant donation of whole villages (1).	1+1
20	A resource is anything in our environment which can be used to satisfy our needs, provided it is technologically accessible, economically feasible and culturally acceptable (1); Examples are water, soil, forests and minerals (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Shelter belts are rows of trees planted to check wind speed and protect the soil (1); They help in stabilising sand dunes and protecting agriculture, e.g., in western India (1); They have helped in stabilising the desert in western India (1).	1+1+1
22	By protecting habitats through national parks and sanctuaries (1); By laws such as the 1972 Act and species projects like Project Tiger (1); By involving people in conservation, as in JFM (1).	1+1+1
23	Sringaverapura near Allahabad had a water harvesting system to channel Ganga floodwater (1); During Chandragupta Maurya's time dams, lakes and irrigation systems were built (1); Bhopal Lake, in the eleventh century, and the Hauz Khas tank, in the fourteenth century, were important tanks (1).	1+1+1
24	Cotton and jute are fibre crops (1); Cotton grows in drier parts of the black soil of the Deccan plateau (1); Jute, the golden fibre, grows on well-drained fertile soil of flood plains (1).	1+1+1
	OR: Black soil is made of volcanic lava and is clayey, found in the Deccan Trap region (1); It retains moisture, becomes sticky when wet and develops cracks when dry (1); It is rich in lime, iron, magnesia and potash, and ideal for cotton (1).	1+1+1
25	In Alwar, villagers declared 1,200 hectares of forest as the Bhairodev Dakav 'Sonchuri' (1); They made their own rules and banned hunting (1); They protected the wildlife from outsiders (1).	1+1+1

	OR: Dams may not control floods when heavy rain fills reservoirs (1); Water released suddenly can flood downstream areas (1); Sedimentation reduces the dam's capacity to hold floodwater (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Land is used for forests, agriculture, pastures, non-agricultural uses and barren wasteland (1); India's total geographical area is about 3.28 million sq km (1); Land use depends on physical factors like topography, soil and climate (1); Human factors such as population density, technology and culture also matter (1); Net sown area is the land actually cropped (1).	1+1+1+1+1
	OR: Reserved forests form more than half of the forest area and are the most valuable (1); Protected forests form about one-third and are guarded against depletion (1); Together they form permanent forest estates (1); Unclassed forests are other forests and wastelands owned by the government, individuals and communities (1); Madhya Pradesh has the largest area under permanent forests (1).	1+1+1+1+1
27	Rainwater harvesting is collecting rain for later use (1); It recharges groundwater (1); It reduces dependence on dams and tube wells (1); It suits dry regions (1); It is cheap and can be done by households and communities (1).	1+1+1+1+1
	OR: Wheat is a Rabi crop of cool growing season and bright sunshine at ripening (1); It needs 50 to 75 cm of evenly distributed annual rainfall (1); The Ganga-Satluj plains and the black soil Deccan are main areas (1); UP, Punjab, Haryana, Madhya Pradesh, Bihar and Rajasthan are major producers (1); It is the second most important cereal (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 2

Chapters 6–9: **Resources and Development (Geography), Forest and Wildlife Resources (Geography), Water Resources (Geography), Agriculture (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(b)** the north-east	Tribal areas
2	**(a)** resource	Needs technology and economy
3	**(a)** Sundarbans	Delta forest
4	**(a)** Siri Fort area	13th century
5	**(b)** fixing nitrogen	Legumes
6	**(b)** renewable resources	Solar, wind
7	**(b)** Tehri	Seed saving
8	**(a)** reduces the water storing capacity	Reservoir
9	**(d)** Watermelon	Summer
10	**(b)** Mahatma Gandhi	Quote
11	**(b)** poaching and loss of habitat	Threats
12	**(c)** rooftop rainwater harvesting	Karnataka, Mysuru
13	**(c)** tropical and sub-tropical climate with well-distributed rain	Plantation
14	**(b)** shelter belts	Dry regions
15	**(a)** 1973	Tiger conservation

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	Project Tiger was launched in 1973 to protect tigers whose numbers had fallen sharply (1); It set up tiger reserves such as Corbett, Sunderbans and Manas (1).	1+1
17	The Narmada Bachao Andolan is a movement opposing the Sardar Sarovar Dam on the Narmada (1); It was led by local people and activists against displacement and environmental damage (1).	1+1
18	Pulses are the major source of protein in a vegetarian diet (1); They are leguminous crops that restore soil fertility by fixing nitrogen (1).	1+1
19	Sustainable development means development that meets present needs without damaging the environment (1); It does not compromise the ability of future generations to meet their own needs (1).	1+1
20	Reserved forests are forests permanently protected for timber and forest produce, with no grazing or hunting (1); They form more than half of the total forest area (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Wheat is a Rabi crop needing a cool growing season and bright sunshine at the time of ripening (1); It needs 50 to 75 cm of annual rainfall evenly distributed (1); The Ganga-Satluj plains and the black soil region of the Deccan are the chief wheat areas (1).	1+1+1
22	Gandhiji said there is enough for everybody's need but not for anybody's greed (1); He blamed the greedy and the exploitative nature of modern technology for resource depletion (1); He favoured production by the masses instead of mass production (1).	1+1+1
23	Mining clears vegetation and pollutes land and water (1); The Buxa Tiger Reserve in West Bengal is threatened by dolomite mining (1); It has disturbed the habitat of species such as Indian elephants (1).	1+1+1
24	About 71 per cent of the Earth's surface is covered with water (1); Of this about 96.5 per cent is in oceans (1); Only about 2.5 per cent is fresh water, mostly locked in ice and glaciers (1).	1+1+1
	OR: Primitive subsistence farming uses simple tools on small plots and depends on monsoon (1); Intensive subsistence farming is practised in densely populated areas with high inputs (1); Commercial farming uses modern inputs for crops grown for sale (1).	1+1+1

25	Sustainable development means progress without harming the environment, so that future generations can also meet their needs (1); It was highlighted by the Brundtland Commission report and the 1992 Rio Summit (1); It requires careful planning and conservation of resources (1).	1+1+1
	OR: It was launched in 1973 to protect the tiger (1); Tiger reserves were created in various states (1); It aims to maintain viable tiger populations and protect their habitat (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Alluvial soil is deposited by rivers in the northern plains and is very fertile (1); It is rich in potash, phosphoric acid and lime, and suits sugarcane, rice and wheat (1); Black soil is formed from lava in the Deccan and is made of fine clay (1); It retains moisture, is sticky when wet and cracks when dry (1); It is ideal for cotton, so called black cotton soil (1).	1+1+1+1+1
	OR: Large river valley projects submerge forests and displace tribals (1); Mining clears vegetation and pollutes land and water (1); Roads and railways cut up habitats (1); Expansion of agriculture takes forest land (1); Wildlife loses habitat and many species are threatened (1).	1+1+1+1+1
27	Water is essential for life, farming and industry (1); Only a small share is fresh and usable (1); It is unevenly distributed (1); It can be polluted and over-used (1); So it needs careful use and conservation (1).	1+1+1+1+1
	OR: Sugarcane needs hot and humid climate, 21 to 27 degrees Celsius and 75 to 100 cm rain (1); Uttar Pradesh, Maharashtra, Karnataka and Tamil Nadu are the major producers (1); Oilseeds such as groundnut, mustard and sesamum give edible oil (1); Cotton grows in black soil with a frost-free period of about 210 days (1); These are raw material for sugar, oil and textile industries (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERKEY

ANSWER KEY & MARKING SCHEME SET 3

Chapters 6–9: **Resources and Development (Geography), Forest and Wildlife Resources (Geography), Water Resources (Geography), Agriculture (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(b)** rooftop rainwater harvesting	Meghalaya
2	**(a)** Yemen	Baba Budan hills
3	**(c)** arid soils	Sandy and saline
4	**(a)** Bhairodev Dakav Sonchuri	Their own sanctuary
5	**(a)** Bhagirathi	Uttarakhand
6	**(b)** Rabi crop	Winter
7	**(d)** khadar	Lowland, fertile
8	**(b)** Corbett National Park	Uttarakhand
9	**(b)** Sutlej	Punjab-Himachal
10	**(d)** modern inputs such as HYV seeds, fertilisers and pesticides	Higher yield
11	**(a)** other than current fallow	Land use
12	**(d)** extinct species	Lost species
13	**(c)** renewable resource	Hydrological cycle
14	**(d)** Ganga-Satluj plains	North-west
15	**(c)** the Rio Earth Summit	Sustainable goals

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	Water demand is rising with population, irrigation, industry and urban use (1); Over-exploitation, pollution and unequal access reduce usable water (1).	1+1
17	Horticulture is the cultivation of fruits and vegetables (1); India is a leading producer of tropical and temperate fruits and vegetables (1).	1+1
18	Bhangar is older alluvium, deposited away from the river floodplain (1); It has a higher concentration of kankar nodules and is less fertile (1).	1+1
19	Unclassed forests are other forests and wastelands belonging to the government, individuals and communities (1); They are not classified as reserved or protected (1).	1+1
20	Tankas are underground tanks built in houses to store rainwater from roofs, in Bikaner, Phalodi and Barmer (1); The water is used for drinking in dry months (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Industries need large amounts of water (1); Many industries pollute water bodies with waste (1); Rapid industrialisation after independence increased competition for water (1).	1+1+1
22	It uses modern inputs such as HYV seeds, fertilisers and pesticides (1); Crops are grown for sale rather than for the family (1); Level of commercialisation varies, e.g., rice is commercial in Haryana and Punjab but subsistence in Odisha (1).	1+1+1
23	Overgrazing, deforestation and mining are major causes of land degradation (1); Over-irrigation leads to waterlogging and salinity (1); Industrial effluents and mineral processing dust also damage land (1).	1+1+1
24	The 1972 Act provided for protection of wild animals, birds and plants (1); It banned hunting and listed protected species (1); It set up national parks, sanctuaries and Project Tiger (1).	1+1+1
	OR: Growing population increases demand for water (1); Over-exploitation of groundwater for irrigation and industry lowers supply (1); Unequal access and pollution make water scarce in India (1).	1+1+1
25	It is practised on small land holdings with family labour (1); Land is farmed intensively with high doses of inputs and irrigation (1); Output per unit area is high but farmers get little surplus (1).	1+1+1

	OR: The first stage is identification and inventory of resources by surveying, mapping and estimation (1); The second stage is evolving a planning structure with appropriate technology, skill and institutions (1); The third is matching resource development plans with national development plans (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Sustainable development means meeting present needs without harming future generations (1); The Brundtland Commission popularised the idea (1); The 1992 Rio de Janeiro Earth Summit adopted Agenda 21 to tackle environmental damage and poverty (1); Over 100 heads of state attended (1); Gandhi's warning against greed expresses the same concern (1).	1+1+1+1+1
	OR: Project Tiger was launched in 1973 to save the tiger (1); Tiger numbers had fallen from 55,000 to 1,827 (1); Tiger reserves like Corbett, Sunderbans, Manas and Periyar were set up (1); The Wildlife Protection Act of 1972 banned hunting and protected habitats (1); It also set up national parks and sanctuaries (1).	1+1+1+1+1
27	Multipurpose projects store water behind dams for many uses (1); They irrigate fields and supply drinking water (1); They generate hydroelectricity (1); They help in flood control (1); Examples are Bhakra-Nangal on the Sutlej and Hirakud on the Mahanadi (1).	1+1+1+1+1
	OR: Rice needs temperature above 25 degrees Celsius (1); Rainfall above 100 cm is required (1); It is a Kharif crop (1); It is grown in the plains of north and north-east, coastal and delta regions (1); In Punjab, Haryana and western UP it is grown with irrigation (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
