THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 1

Chapters 10–12: **Minerals and Energy Resources (Geography), Manufacturing Industries (Geography), Lifelines of National Economy (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(b)** manufacturing of steel and ferro-manganese alloy	Alloy
2	**(a)** cheap and constant power	Bauxite
3	**(a)** state governments	Link state capitals
4	**(a)** aluminium	Non-ferrous
5	**(a)** electronic capital of India	IT hub
6	**(d)** trade	Lifeline
7	**(d)** Madhya Pradesh	Balaghat
8	**(a)** a good conductor	Properties
9	**(d)** Kerala	Low in J&K
10	**(a)** falling water	Dams
11	**(c)** Gujarat, Tamil Nadu, Uttar Pradesh, Punjab and Kerala	Producers
12	**(d)** Central Public Works Department	NHAI
13	**(c)** Chhattisgarh	Iron ore
14	**(d)** Delhi, Gurugram, Mumbai, Chennai	Hubs
15	**(d)** Silchar and Porbandar	Corridor

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	Solar energy is energy from the sun converted into electricity by photovoltaic technology (1); It is a renewable and pollution-free source (1).	1+1
17	Cement is essential for construction such as houses, factories, bridges and dams (1); The first plant was in Chennai in 1904 and limestone is the main raw material (1).	1+1
18	Mumbai (1); Kochi (1).	1+1
19	Mumbai High is an offshore oilfield in the Arabian Sea off Mumbai (1); It is the largest petroleum-producing region of India (1).	1+1
20	Consumer industries produce goods for direct use by consumers (1); Sugar, toothpaste, paper and soaps are examples (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Minerals occur in veins and lodes in igneous and metamorphic rocks (1); In sedimentary rocks they occur in beds or layers (1); Some form by decomposition of rocks, leaving residual weathered material, e.g., bauxite (1).	1+1+1
22	Fertiliser industries produce nitrogenous, phosphatic and potash fertilisers (1); Gujarat, Tamil Nadu, Uttar Pradesh, Punjab and Kerala are major (1); They are needed for the Green Revolution crops (1).	1+1+1
23	Ports handle ships and cargo (1); They are gateways of foreign trade (1); They provide loading, storage and exports (1).	1+1+1
24	Peat is the first stage with low carbon and high moisture (1); Lignite is low-grade brown coal and bituminous is the most popular commercial coal (1); Anthracite is the highest quality hard coal (1).	1+1+1
	OR: Iron and steel is the basic industry because machines, tools and construction need steel (1); It supplies other industries (1); Its production is a measure of development (1).	1+1+1
25	Pipelines carry crude oil and natural gas (1); The Hazira-Vijaipur-Jagdishpur pipeline carries gas (1); Oil moves from Assam oil fields to refineries like Barauni (1).	1+1+1

	OR: Haematite has 60 to 70 per cent iron and is the most important ore (1); Magnetite has over 70 per cent iron and is the best quality ore (1); Magnetite has magnetic qualities and is used in the electrical industry (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Mica is a non-metallic mineral used in electrical and electronic industries as insulator (1); It occurs in Jharkhand's Koderma-Gaya-Hazaribagh belt, Andhra and Rajasthan (1); Limestone is found in calcium carbonate rocks (1); It is the raw material for cement and smelting iron (1); It is found in sedimentary rocks, mainly in Gujarat, Rajasthan and Madhya Pradesh (1).	1+1+1+1+1
	OR: Jute is located along the Hugli (1); The first jute mill was at Rishra in 1855 (1); Sugar mills are in Maharashtra, Uttar Pradesh and the south (1); Many sugar mills are cooperatives (1); Both are agro-based and face competition and old technology (1).	1+1+1+1+1
27	Pipelines move oil and gas without traffic (1); The Hazira-Vijaipur-Jagdishpur line carries gas (1); Waterways are cheapest for bulky goods (1); NW-1, NW-2 and NW-3 are national waterways (1); They are under-used in India (1).	1+1+1+1+1
	OR: Coal is the most abundant fossil fuel in India (1); Types are peat, lignite, bituminous and anthracite (1); Gondwana coal is found in the Damodar, Mahanadi and Godavari valleys (1); Lignite is found in Neyveli (1); Coal is used for power and industry (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 2

Chapters 10–12: **Minerals and Energy Resources (Geography), Manufacturing Industries (Geography), Lifelines of National Economy (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(c)** Odisha	Panchpatmali
2	**(b)** Rishra in 1855	Bengal
3	**(c)** tidal port	Gujarat
4	**(c)** cement industry	Also in smelting iron
5	**(d)** cooperative sector	Sugar mills in Maharashtra
6	**(d)** Odisha	Iron ore export
7	**(b)** nuclear power station	Maharashtra
8	**(a)** sugarcane must be crushed soon after harvest	Raw material
9	**(c)** remote areas of the north-east and J&K	Oil and Natural Gas Corporation
10	**(c)** about three-fourths	Iron, manganese, nickel
11	**(c)** Maharashtra and Gujarat	Black soil region
12	**(d)** largest in the world	Postal
13	**(c)** Karnataka	Western Ghats
14	**(c)** Andhra Pradesh	Port-based plant
15	**(d)** 1960	Strategic roads

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	A tidal port is a port affected by the rise and fall of tides, e.g. Kandla (1); It handles ships mainly at high tide and helps Gujarat (1).	1+1
17	Natural gas is a clean fossil fuel found with petroleum deposits (1); It is used as a fuel, as CNG and as an industrial raw material (1).	1+1
18	Industrial pollution is the contamination of air, water, land and noise by industrial activity (1); It harms the environment and health (1).	1+1
19	NHAI is the National Highways Authority of India (1); It builds and maintains national highways and the Golden Quadrilateral (1).	1+1
20	Minerals are finite and non-renewable and take millions of years to form (1); Conservation ensures their availability for the future (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Manufacturing modernises agriculture and creates jobs (1); It reduces dependence on agriculture and eliminates unemployment and poverty (1); It brings foreign exchange by exports and helps regional balance (1).	1+1+1
22	Roads are used for short distances and give door-to-door service (1); They link villages and remote areas to towns (1); Construction is cheap and they can cross difficult terrain (1).	1+1+1
23	Bauxite is the ore from which aluminium is extracted (1); Aluminium is light, strong and a good conductor, so it is used in aircraft and electricals (1); Odisha leads in bauxite production, Panchpatmali being a major deposit (1).	1+1+1
24	Heavy industries use bulky raw materials, e.g., iron and steel (1); Light industries use light raw materials and produce light goods, e.g., electrical industries (1); This classification depends on the weight of raw material and product (1).	1+1+1
	OR: The North-South corridor connects Srinagar and Kanyakumari, about 4,000 km (1); The East-West corridor connects Silchar and Porbandar, about 3,300 km (1); They improve connectivity across the country (1).	1+1+1
25	Minerals are finite and non-renewable (1); Rich deposits are few, and costly to extract when low in grade (1); Recycling and substitutes help to conserve them (1).	1+1+1

	OR: Public sector industries are owned by government (1); Private sector industries are owned by individuals or companies (1); Joint sector are run by the state with private firms, and cooperative sector by producers (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Aluminium smelting needs bauxite and cheap power (1); It is light and corrosion resistant (1); Chemical industries make fertilisers, paints and drugs (1); They are in Gujarat, Tamil Nadu and Maharashtra (1); Both support other industries (1).	1+1+1+1+1
	OR: Air transport is the fastest mode (1); It is costly (1); It connects remote areas (1); Pawan Hans provides helicopter service in hills and the north-east (1); It is important for perishables and emergency (1).	1+1+1+1+1
27	Bauxite is the ore of aluminium (1); Aluminium is light, strong and a good conductor (1); Odisha is the leading producer of bauxite (1); Copper is malleable and ductile and used in electrical goods (1); Madhya Pradesh is the largest copper producer (1).	1+1+1+1+1
	OR: The first successful mill was in Mumbai in 1854 (1); Mills are in Maharashtra and Gujarat (1); Weaving is in the decentralised sector (1); Problems are power cuts, old machinery and low productivity (1); Competition from synthetics is also a problem (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 3

Chapters 10–12: **Minerals and Energy Resources (Geography), Manufacturing Industries (Geography), Lifelines of National Economy (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(d)** malleable, ductile and a good conductor	Electrical industry
2	**(c)** TISCO at Jamshedpur	1907
3	**(c)** rural roads under PMGSY	Villages
4	**(d)** photovoltaic technology	Panels
5	**(d)** 1984	Methyl isocyanate leak
6	**(c)** Zila Parishad	Link district headquarters
7	**(d)** 60-70% iron	Most important
8	**(d)** Maharashtra	Farmers own the mills
9	**(d)** lifelines of a nation's economy	Link production and consumption
10	**(b)** manganese	India
11	**(d)** private sector	TISCO, Dabur
12	**(a)** West Coast Canal, Kottapuram to Kollam	205 km
13	**(b)** Neyveli	Tamil Nadu
14	**(c)** manufacturing	Secondary activity
15	**(b)** gems and jewellery, software	Items

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	On the basis of raw material, industries are agro-based and mineral-based (1); Agro-based include cotton, jute and sugar, mineral-based include iron and steel and cement (1).	1+1
17	The North-South corridor links Srinagar with Kanyakumari (1); The East-West corridor links Silchar in Assam with Porbandar in Gujarat (1).	1+1
18	Ferrous minerals contain iron, such as iron ore and manganese (1); Non-ferrous minerals do not contain iron, such as copper, bauxite and gold (1).	1+1
19	It modernises agriculture and creates jobs in secondary and tertiary sectors (1); It brings foreign exchange through exports and reduces regional disparities (1).	1+1
20	International trade is the exchange of goods and services among countries (1); It consists of exports and imports, and is a barometer of a nation's economy (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	The Golden Quadrilateral links Delhi, Kolkata, Chennai and Mumbai (1); It is a 5,846 km long four or six lane highway (1); It reduces travel time and cost, and helps trade (1).	1+1+1
22	The Odisha-Jharkhand belt has Mayurbhanj and Kendujhar (1); The Durg-Bastar-Chandrapur belt includes Bailadila in Chhattisgarh (1); The Ballari-Chitradurga-Chikkamagaluru-Tumakuru belt includes Kudremukh in Karnataka (1).	1+1+1
23	Aluminium is light, corrosion-resistant and a good conductor (1); Smelting needs cheap and constant power (1); It is made from bauxite and used in aircraft and utensils (1).	1+1+1
24	Mumbai has a natural harbour (1); Kandla is a tidal port (1); Jawaharlal Nehru Port, Marmagao and Kochi are other west coast ports (1).	1+1+1
	OR: Minerals are metallic and non-metallic (1); Metallic minerals are ferrous (iron ore, manganese) and non-ferrous (copper, bauxite) (1); Non-metallic minerals include mica, limestone and also energy minerals such as coal and petroleum (1).	1+1+1
25	Jute is concentrated along the Hugli river (1); The first mill was at Rishra in 1855 (1); Jute is used for sacks, mats and ropes, and faces competition from synthetics (1).	1+1+1

	OR: Road traffic is heavy and roads get congested (1); Many roads are poorly maintained and narrow (1); Accidents and pollution are rising (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Railways are the principal mode of transport (1); The first train ran from Bombay to Thane in 1853 (1); They carry goods and passengers (1); The Konkan Railway links Mumbai and Mangalore (1); Problems are ticketless travel, theft and damage (1).	1+1+1+1+1
	OR: Use public transport (1); Switch off unused lights (1); Use power-saving devices (1); Check electrical equipment regularly (1); Use non-conventional sources (1).	1+1+1+1+1
27	Industries provide jobs (1); They add to GDP and exports (1); They modernise farming (1); They reduce regional gaps (1); They supply goods to consumers (1).	1+1+1+1+1
	OR: Roads are flexible and door-to-door (1); Rail is cheaper for heavy goods over long distances (1); Roads suit short distances (1); Rail is less flexible (1); Both are essential (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
