THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 1

Chapters 10–12: **Minerals and Energy Resources (Geography), Manufacturing Industries (Geography), Lifelines of National Economy (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
2	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
3	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
4	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
5	**(d)** Durgapur - Gujarat	Durgapur is in West Bengal
6	**(b)** trade, transport and communication	Link production and markets
7	**(b)** aluminium	Light metal
8	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
9	**(b)** Kandla - tidal port	Kandla has tides
10	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
11	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
12	**(c)** combines the strengths of different modes	Road-rail-sea together
13	**(b)** Digboi - oil	Oldest oil field
14	**(c)** information technology	Software services
15	**(d)** roads are the most used mode of transport in India	Roads carry most traffic

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	It gives large energy but has accident and waste risks (1); Safety and cost are debated (1).	1+1
17	Water is scarce (1); Recycling cuts costs and pollution (1).	1+1
18	Modern business and services need internet (1); It is like roads for the information economy (1).	1+1
19	Mining displaces tribals and destroys forests (1); It pollutes water and damages livelihoods (1).	1+1
20	Solid waste and chemicals contaminate soil (1); Fertility falls and land becomes unfit (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Villages need fuel for cooking and light (1); Biogas and solar meet needs (1); This reduces deforestation (1).	1+1+1
22	The Bhopal tragedy showed safety lapses (1); Rules and training are needed (1); Accidents cost lives (1).	1+1+1
23	Strikes or floods delay goods (1); Prices rise (1); Production and exports suffer (1).	1+1+1
24	Coal runs most thermal plants (1); It is cheap and abundant (1); But it pollutes and releases carbon dioxide (1).	1+1+1
	OR: Synthetic competition (1); Old machines (1); Falling demand (1).	1+1+1
25	Farmers cannot sell produce (1); Schools and clinics are hard to reach (1); Villages stay poor (1).	1+1+1
	OR: Solar is available everywhere in sunny regions (1); Wind needs strong steady winds (1); Solar suits scattered villages, wind suits windy coasts (1).	1+1+1

SECTION — D (Long Answer) — Answers

2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Most metallic minerals lie in the old crystalline rocks of the Peninsular plateau, while coal is found in the Gondwana valleys of the Damodar, Mahanadi, Sone and Godavari (1); Iron ore belts are in Odisha-Jharkhand, Chhattisgarh and Karnataka; Odisha leads in manganese and bauxite, and Madhya Pradesh in copper (1); Petroleum comes from Mumbai High, Gujarat and Assam, while limestone and other minerals occur in sedimentary rocks of the western and southern parts (1); This uneven distribution gives mineral-rich states raw materials for steel, aluminium and power industries and export earnings (1); Yet many of these states remain poor and suffer environmental damage, so benefits must be shared more fairly (1).	1+1+1+1+1
	OR: Cotton textiles are concentrated in Maharashtra and Gujarat, near cotton fields, markets and ports, with the first successful mill set up in Mumbai in 1854 (1); Spinning is mechanised, but weaving is largely in the decentralised sector of handloom and powerloom (1); Jute mills are mostly in the Hugli basin of West Bengal, the first one coming up at Rishra in 1855 (1); Cotton mills suffer from irregular power supply, old machinery, low labour productivity and competition from synthetic fibres (1); Jute faces competition from synthetic substitutes, lower demand and old machinery, so modernisation is needed (1).	1+1+1+1+1
27	Globalisation raised trade volumes, so ports, roads and railways needed upgrading (1); Software and services exports grew with communication technology (1); Imports of oil and machinery rose (1); Container ports like Jawaharlal Nehru Port handle growing cargo (1); Competition forced improvement of transport and logistics (1).	1+1+1+1+1
	OR: Solar energy has huge potential in India because of abundant sunshine and can be used in remote villages through photovoltaic cells (1); Wind energy is developed in Tamil Nadu, Gujarat, Karnataka and Andhra Pradesh (1); Biogas uses dung and farm waste for cooking and gives manure (1); Limits include high setup costs, dependence on weather, storage problems and need for suitable sites (1); Research, investment and policy support can overcome them (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTER

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 2

Chapters 10–12: **Minerals and Energy Resources (Geography), Manufacturing Industries (Geography), Lifelines of National Economy (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(b)** using public transport	Less fuel use
2	**(a)** coking coal	Used in blast furnaces
3	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
4	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
5	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
6	**(c)** dense population and scattered settlements	Many roads needed
7	**(a)** nuclear power plants	Atomic power
8	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
9	**(c)** Srinagar and Kanyakumari	About 4,000 km
10	**(c)** A is true but R is false.	A false; R true
11	**(a)** cheaper synthetic substitutes	Plastic bags and synthetics
12	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
13	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
14	**(d)** 25 per cent by 2022	To raise growth
15	**(c)** NW-1 - Krishna river	NW-1 is on the Ganga

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	Persistent deficits drain foreign exchange (1); Balanced trade keeps the economy stable (1).	1+1
17	Some regions get industry while others lack resources (1); It causes regional inequality and trade dependence (1).	1+1
18	Liberalisation opened markets (1); It raised competition and investment (1).	1+1
19	Perishables spoil fast (1); Planes carry them quickly to far markets (1).	1+1
20	Fossil fuels are limited and polluting (1); Renewable sources are cleaner and technology costs are falling (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Ports allow import of raw materials (1); They enable exports (1); They attract industries (1).	1+1+1
22	Better ports handle more cargo (1); Costs fall (1); Exports grow (1).	1+1+1
23	Government sets policies and prices (1); It supports renewables and imports (1); It promotes saving and efficiency (1).	1+1+1
24	Cooperatives pool farmers' resources (1); They assure markets and incomes (1); They develop rural areas (1).	1+1+1
	OR: India sells more varied goods (1); Software and services grow (1); New markets open (1).	1+1+1
25	Mining gives raw materials and jobs (1); It damages forests and land (1); Rules, restoration and recycling balance both (1).	1+1+1
	OR: Odisha and Jharkhand have bauxite (1); They have cheap power from coal (1); Smelters use both (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks

26	Liberalisation after 1991 opened the economy to foreign investment and competition (1); It improved technology, quality and productivity in industries such as automobiles and electronics (1); Consumers got more choice (1); Some old industries and small units struggled against imports (1); Overall, industry became more efficient, but pollution and job insecurity need attention (1).	1+1+1+1+1
	OR: Roads carry most traffic in India, give door-to-door service and link villages, but suffer from congestion and accidents (1); Railways are the principal mode for bulky goods and passengers over long distances, but face ticketless travel, theft, old tracks and congestion (1); Pipelines carry crude oil and gas continuously at low cost, and waterways are the cheapest for heavy goods but are under-used because of silting and few terminals (1); Air transport is the fastest and reaches remote areas through services such as Pawan Hans, but is costly (1); Together they link production, consumption and trade, and each needs better maintenance and integration (1).	1+1+1+1+1
27	Thermal power is the largest source, using coal, petroleum and natural gas, and plants are located near coalfields (1); Hydroelectricity uses falling water, is renewable and clean, but needs dams and suitable relief, as at Bhakra-Nangal (1); Nuclear power uses uranium and thorium, and stations are at Tarapur, Kota and Kalpakkam (1); Thermal power causes pollution, hydel power displaces people, and nuclear power carries safety and waste risks (1); A balanced mix is necessary to meet rising demand (1).	1+1+1+1+1
	OR: IT and electronics include software, computers and telecom equipment, and Bengaluru is the electronic capital of India (1); Software Technology Parks provide infrastructure to boost exports and create jobs for educated youth (1); These industries cause little pollution (1); Chemical industries produce fertilisers, pesticides, paints, soaps and drugs and are located in Gujarat, Tamil Nadu, Maharashtra and elsewhere (1); Chemicals support agriculture and industry but also cause pollution (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 3

Chapters 10–12: **Minerals and Energy Resources (Geography), Manufacturing Industries (Geography), Lifelines of National Economy (Geography)** | Class 10 Social_Science | Maximum Marks: 50

SECTION — A (Objective Type) — Answers — 15 × 1 = 15

Q.	Correct Option	Brief Reasoning
1	**(b)** biogas	Organic waste is used
2	**(b)** cooperative industry	Farmers own it
3	**(d)** local employment and income	Jobs in services
4	**(c)** Mumbai High - coal	Mumbai High is an oilfield
5	**(c)** old technology	Low labour productivity too
6	**(a)** helicopter	Pawan Hans serves such areas
7	**(d)** non-conventional energy sources are eco-friendly	Solar and wind are clean
8	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
9	**(b)** have no coastline of their own	Use ports of nearby states
10	**(b)** it is dangerous	Narrow tunnels
11	**(b)** Visakhapatnam	Located on the coast
12	**(c)** waterways are the fastest mode	Waterways are slow
13	**(b)** making steel	Mica is an insulator
14	**(a)** chemicals	Effluents and gases
15	**(b)** Silchar and Porbandar	About 3,300 km

SECTION — B (Very Short Answer) — Answers — 5 × 2 = 10

Q.	Expected Answer / Value Points	Marks
16	Treatment plants and filters are costly (1); Firms need to invest, but society gains (1).	1+1
17	Rivers silt up and become shallow (1); Dredging keeps channels deep for ships (1).	1+1
18	CNG burns cleaner than petrol or diesel (1); It reduces air pollution in cities (1).	1+1
19	Cars need steel, rubber and glass (1); Growth in autos raises demand for them (1).	1+1
20	Roads may be poorly built or overcrowded (1); Quality, capacity and links matter too (1).	1+1

SECTION — C (Short Answer) — Answers — 5 × 3 = 15

Q.	Expected Answer / Value Points	Marks
21	Industries choose well-connected places (1); Ports and highways cut costs (1); Remote areas get less industry (1).	1+1+1
22	Scrap metal reused cuts mining (1); It saves energy and costs (1); It reduces pollution (1).	1+1+1
23	Industry creates growth and jobs (1); It also pollutes (1); Balance needs controls (1).	1+1+1
24	Old tracks and trains (1); Funds are limited (1); Safety and speed need upgrading (1).	1+1+1
	OR: Domestic crude oil is far less than demand (1); Transport and industry demand has grown (1); So India imports much oil (1).	1+1+1
25	Sugar mills moved to south and west (1); Cane there has higher sugar content (1); Cooler climate gives a longer crushing season and cooperatives are strong (1).	1+1+1
	OR: Rivers are seasonal and shallow (1); Silting limits movement (1); Few terminals and slow speed deter users (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
26	Vehicles burn fuel and pollute the air, and roads and railways cut through forests (1); Noise, congestion and accidents increase (1); Oil transport can cause spills (1); Solutions include public transport, CNG, more rail and waterway use (1); Cleaner fuels and efficient planning reduce the harm (1).	1+1+1+1+1

	OR: Coal is the most abundant fossil fuel in India and is the main source of thermal power, but it pollutes the air (1); Petroleum from Mumbai High, Gujarat and Assam and natural gas from the Krishna-Godavari basin supply fuel, CNG and raw material for industries, but India imports much crude oil (1); Hydroelectricity, nuclear power from uranium and thorium, and non-conventional sources like solar, wind, biogas, tidal and geothermal are being developed (1); India has abundant sunshine, and the largest cluster of wind farms stretches from Nagercoil to Madurai (1); A shift to renewable sources, along with energy conservation, is required for sustainable supply (1).	1+1+1+1+1
27	Industries are classified by raw material (agro-based and mineral-based), role (basic and consumer), capital (small and large scale), ownership (public, private, joint, cooperative) and bulk of raw material and product (heavy and light) (1); Location depends on availability of raw material, power, labour, capital, transport, markets and government policy (1); Weight-losing raw materials pull industries towards sources: iron and steel near iron ore and coal, sugar near cane fields (1); Cotton textiles grew near cotton and ports in Mumbai and Gujarat, and aluminium near cheap power (1); Industries also cluster near cities and ports for banking, transport and markets, called agglomeration economies (1).	1+1+1+1+1
	OR: Some regions such as the northern plains and coastal states have dense road and rail networks, while hilly and north-eastern areas have low density (1); Kerala has high road density because of dense population, while Jammu and Kashmir has low density because of rugged terrain (1); Rural areas lack all-weather roads (1); Terrain and cost explain much of the difference (1); Policy should extend connectivity to lagging regions through schemes like PMGSY (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
