SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	2nd year $= 14,00,000$ (1); 3rd year $= 15,50,000$ (1); 4th year $= 17,00,000$ (1); Total $= 59,00,000$ (2).	1+1+1+2
	OR: Full days: $12,50,000 \div 40,000$ gives 31 full days (1); Remaining $= 10,000$ m (2); Total days to finish: 32 (2).	1+2+2
20	2nd year $= 26,50,000$ (1); 3rd year $= 29,00,000$ (1); 4th year $= 31,50,000$ (1); Total $= 1,11,00,000$ (2).	1+1+1+2

Mistakes to avoid:

- Putting commas after every three digits in the Indian system, or after every two digits in the international system.
- Thinking 1 crore = 10 lakh; 1 crore = 100 lakh.
- Confusing 1 million with 1 lakh: 1 million = 10 lakh.
- Counting the wrong number of zeros: 1 lakh has 5 zeros, 1 crore has 7 zeros.
- When rounding, looking at the digit in the rounding place instead of the digit just to its right.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
