Chapter 3: **A Peek Beyond the Point** | Class 7 Maths | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** 0.024	Multiply two at a time and count the decimal places carefully.
2	**(b)** 48	Divide the larger number by the smaller.
3	**(a)** 7	Divide the part by the fraction it represents.
4	**(b)** 1.7	Work out the bracket first.
5	**(c)** 0.95	Find how far each number is from 1.
6	**(a)** 2.65	Subtract the smaller number from the larger.
7	**(b)** $\frac{1}{8}$	Write over 1000, 100 or 10 and reduce.
8	**(a)** $\frac{1}{2}$	Convert every number to a decimal and compare.
9	**(a)** Both A and R are true and R is the correct explanation of A.	0.50 > 0.45.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both true; a zero at the end of a decimal part does not change the value, but R does not explain it.

	OR: Price per kg $= 93 \div 1.5 = 62$ (1); Cost of 2.5 kg $= 62 \times 2.5 = 155$ (2).	1+2

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) $85.5 \times 2.5 = 213.75$, i.e. ₹213.75 (1). (ii) $250 - 213.75 =$ ₹36.25 (1). (iii) $85.5 \times 4 =$ ₹342 (1). (iv) $513 \div 85.5 = 6$ m (2).	1+1+1+2
20	Net gain per minute $= 9.5 - 2.5 = 7$ litres (2); Time $= 84 \div 7 = 12$ minutes (3).	2+3

Mistakes to avoid:

- Thinking 0.45 is greater than 0.5 because 45 is greater than 5; compare 0.45 with 0.50.
- Not lining up the decimal points when adding or subtracting.
- Wrong number of decimal places in a product: $0.3 \times 0.2 = 0.06$, not 0.6.
- Forgetting to shift the point in both the dividend and divisor when dividing by a decimal.
- Rounding by looking at the rounding digit itself instead of the digit just after it.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

Chapter 3: **A Peek Beyond the Point** | Class 7 Maths | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** 8	Divide the part by the fraction it represents.
2	**(a)** 2.5	Work out the bracket first.
3	**(a)** 1.04	Find how far each number is from 1.
4	**(b)** 1.125	Subtract the smaller number from the larger.
5	**(b)** $\frac{3}{8}$	Write over 1000, 100 or 10 and reduce.
6	**(a)** $\frac{7}{8}$	Convert every number to a decimal and compare.
7	**(a)** 0.2	Multiply two at a time and count the decimal places carefully.
8	**(b)** 30	Divide the larger number by the smaller.
9	**(c)** A is true but R is false.	The digit after the hundredths place (5, 6) decides: 3.456 rounds to 3.46, so A is true. 6 is in the thousandths place, so R is false.
10	**(d)** A is false but R is true.	3 x 2 = 6 with two decimal places gives 0.06, so A is false. R is true.
