THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 3

Chapter 1: **Exploring Substances: Acidic, Basic and Neutral** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. $HCl + NaOH \longrightarrow NaCl + H_2O$ is an example of: 1

(a) decomposition **(b)** neutralisation **(c)** combination only **(d)** displacement

2. Lactic acid is present in: 1

(a) curd **(b)** vinegar **(c)** lemon **(d)** tomato

3. Substances that change their colour in acidic and basic solutions are called: 1

(a) solutes **(b)** indicators **(c)** solvents **(d)** catalysts

4. The salt formed when HCl reacts with NaOH is: 1

(a) sodium sulphate **(b)** calcium chloride
(c) sodium chloride **(d)** potassium chloride

5. Which acid is present in the sting of an ant? 1

(a) lactic acid **(b)** formic acid **(c)** citric acid **(d)** acetic acid

6. Litmus is obtained from: 1

(a) turmeric **(b)** lichens **(c)** cabbage **(d)** roses

7. The sting of a wasp is treated with: 1

(a) sugar **(b)** vinegar **(c)** lime water **(d)** baking soda

8. Hydrochloric acid is represented by the formula: 1

(a) $NaOH$ **(b)** CH_3COOH **(c)** H_2SO_4 **(d)** HCl

9. Blue litmus turns red in: 1

(a) base **(b)** water **(c)** acid **(d)** sugar solution

10. The sting of an ant is treated with: 1

(a) salt **(b)** sugar **(c)** baking soda **(d)** vinegar

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Give two examples of neutral substances. 2

12. Name two acids found in food items and their sources. 2

13. How is acidic soil treated by farmers? 2

14. Why is factory waste neutralised before it is released into water bodies? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Why does a person with acidity take milk of magnesia? 3

16. What is meant by a neutral solution? Give two examples and the effect on litmus. 3

17. Describe the role of acids and bases in the digestion and the household cleaning. 3

OR

Explain how curd and lemon differ from soap and baking soda in taste and touch. 3

18. Differentiate between a concentrated and a dilute acid with an example. 3

OR

Give three examples of solutions that are neutral. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain the natural indicators with their colour changes and how to prepare one from turmeric. 5

OR

Describe the use of bases in daily life in five points. 5

20. Explain why we should not use laboratory acids and bases without supervision. State precautions. 5

OR

Explain how indicators help to identify neutral substances. 5

END OF QUESTION PAPER — Total: 40 Marks
