- Saying that puberty starts at the same age in all children; it starts **earlier in girls** than in boys and varies from person to person.
- Writing that hormones are carried by ducts; endocrine glands are **ductless** and hormones travel in the blood.
- Confusing the glands: *testes* make testosterone, *ovaries* make oestrogen, *pancreas* makes insulin.
- Saying the voice breaks because of the throat or lungs; it is due to the enlargement of the **voice box (larynx)**.
- Calling menstruation an illness; it is a natural process and needs hygiene, not shame.
- Treating mood swings as bad behaviour; they are caused by hormones and can be managed with sleep, exercise and talking.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
