THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 5: **Adolescence: A Stage of Growth and Change** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A 14-year-old girl is shorter than her 14-year-old male cousin. The best explanation is: 1

(a) she is ill
(b) growth rates vary and the cousin may have started his spurt
(c) she is old
(d) she is not eating

2. A boy's voice is 'cracking'. This is temporary because: 1

(a) larynx is growing and adjusting **(b)** he is cold
(c) voice is lost **(d)** he is ill

3. A graph of height against age for a typical teenager shows: 1

(a) a rapid rise during the growth spurt **(b)** a straight line only
(c) a fall **(d)** no change

4. A teenager thinks late puberty means something is wrong. The correct advice: 1

(a) it is a disease **(b)** it is rare
(c) it is within the normal range **(d)** it must be treated

5. If the ovaries do not function, a girl may not have: 1

(a) breathing **(b)** digestion **(c)** menstruation **(d)** growth

6. In which year is the average growth rate highest for girls? 1

(a) around 20 **(b)** around 11 to 13 years
(c) around 2 **(d)** around 40

7. A student with tiredness, pale tongue and poor concentration has these symptoms mostly due to: 1

(a) anaemia **(b)** goitre **(c)** rickets **(d)** scurvy

8. If testes were removed in an adult, secondary sexual characters may: 1

(a) become female **(b)** stay unchanged forever
(c) double **(d)** be affected over time

9. **Assertion (A):** Adolescence is a period of rapid growth in height and body changes. 1
Reason (R): Hormones secreted during puberty control these changes.
Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** The pituitary gland is called the master gland. 1
Reason (R): The pituitary gland secretes the hormone insulin.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Explain why the endocrine system is called the 'chemical messenger system'. 2

12. Why do boys have a higher proportion of muscle growth during adolescence? 2

13. Why is emotional support as important as physical care during adolescence? 2

14. Why do two persons of the same age show different features of puberty? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain the effect of removing the pituitary gland in a child on growth and on other glands. 3

16. A diabetic friend wants to join a picnic. What advice would you give about food and medicines? 3

17. Explain how adrenaline helps in exams or sports. 3

OR

A teenager eats little fruit and many fried snacks and gets frequent mouth ulcers. Identify the likely deficiency and prescribe a diet. 3

18. Explain the importance of exercising in daylight for bones. 3

OR

How would you respond if someone teases a classmate about body changes? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** Rahul, aged 13, notices that he is growing taller quickly, hair is appearing on his face, and his voice sometimes 'cracks' while speaking. He feels shy about these changes, but his teacher explains that they are normal. 5
(i) What is the stage of life in which these changes occur called?
(ii) Name the male sex hormone responsible for them.
(iii) Name the organ that secretes this hormone.
(iv) Explain why Rahul's voice becomes deeper.

20. Compare the roles of nervous system and endocrine system in adolescent changes and in responding to stress. 5

OR

Analyse a case: Aman feels tired, eats only chips and sweets and has pimples. Suggest causes and remedies. 5

END OF QUESTION PAPER — Total: 40 Marks
