ANSWER KEY & MARKING SCHEME SET 1

Chapter 8: **Life Processes in Animals** | Class 7 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** ingestion	Ingestion is intake.
2	**(c)** villi	They increase surface area.
3	**(b)** breathing	Intake of O2 and release of CO2.
4	**(c)** gills	Dissolved oxygen.
5	**(b)** digestion	Digestion.
6	**(c)** liver	It makes bile.
7	**(d)** nostrils	Nose.
8	**(b)** moist skin	Skin.
9	**(c)** absorption	Absorption.
10	**(b)** gall bladder	It helps digest fats.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Ingestion, digestion, absorption (1); Assimilation and egestion (1).	1+1
12	Finger-like projections in the small intestine (1); Increase surface for absorption (1).	1+1
13	Carries oxygen (1); Gives blood red colour (1).	1+1
14	Moistens food (1); Salivary amylase digests starch (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Mouth to oesophagus (1); Stomach to small intestine (1); Large intestine to anus (1).	1+1+1
16	Heart contracts and relaxes (1); Blood pushed into arteries (1); Veins return blood (1).	1+1+1
17	Cockroach: spiracles and tracheae (1); Fish: gills (1); Both take oxygen (1).	1+1+1
	OR: Teeth chew, saliva acts on starch (1); Stomach churns food (1); Acid and pepsin digest proteins (1).	1+1+1
18	Throb of arteries (1); Count at the wrist (1); About 72 per minute (1).	1+1+1
	OR: Kidneys: urea (1); Skin: sweat (1); Lungs: carbon dioxide (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Mouth: chewing, saliva (1); Oesophagus: carries food (1); Stomach: digestion of proteins (1); Small intestine: digestion and absorption (1); Large intestine: water absorption (1).	1+1+1+1+1
	OR: Kidneys filter blood (1); Urine in ureters (1); Stored in bladder (1); Passed through urethra (1); Waste removal (1).	1+1+1+1+1
20	Starch by amylase (1); Proteins by pepsin (1); Fats by lipase and bile (1); Final products absorbed (1); Pancreatic juice helps (1).	1+1+1+1+1
	OR: Swallow grass (1); Stored in rumen (1); Returned as cud and chewed (1); Cellulose digested (1); Four-chambered stomach (1).	1+1+1+1+1

Mistakes to avoid:

- Saying that bile contains enzymes; bile only helps in digesting **fats** and is made by the liver.
- Writing that arteries carry blood to the heart and veins from the heart; it is exactly the **opposite**.
- Confusing ingestion, digestion, absorption and egestion, especially calling egestion 'excretion'.
- Mixing up breathing (taking air in and out) with respiration (release of energy from food in cells).
- Writing that the large intestine digests food; it mainly **absorbs water**.
- In the breathing movement, saying the diaphragm moves up during inhalation; it moves **down**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

ANSWER KEY & MARKING SCHEME SET 2

Chapter 8: **Life Processes in Animals** | Class 7 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** lungs	They exchange gases.
2	**(c)** heart	Heart.
3	**(a)** egestion	Egestion.
4	**(d)** fats	Emulsifies fats.
5	**(c)** diaphragm	It aids breathing.
6	**(b)** arteries	Thick-walled.
7	**(d)** mouth	Saliva starts starch digestion.
8	**(b)** large intestine	Reabsorbs water.
9	**(d)** moves down	Chest volume increases.
10	**(a)** veins	Thin-walled.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Moves down on inhalation (1); Moves up on exhalation (1).	1+1
12	Fish: gills (1); Cockroach: tracheae (1).	1+1
13	Secretes bile (1); Helps in fat digestion (1).	1+1
14	Plasma and red blood cells (1); White blood cells and platelets (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Bile: fat digestion (1); Pancreatic juice: digests starch, protein, fat (1); Released into small intestine (1).	1+1+1
16	Red: carry oxygen (1); White: fight germs (1); Platelets: clotting (1).	1+1+1
17	Strengthens the heart (1); Improves lung capacity (1); Better blood flow (1).	1+1+1
	OR: Inhalation: diaphragm down, ribs up (1); Chest expands, air enters (1); Exhalation: reverse, air leaves (1).	1+1+1
18	Surrounds food with pseudopodia (1); Forms food vacuole (1); Digests and egests (1).	1+1+1
	OR: Receives bile and pancreatic juice (1); Completes digestion (1); Villi absorb food (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Inhalation: diaphragm moves down (1); Ribs move up and out (1); Lungs fill (1); Exhalation: reverse (1); Air with carbon dioxide leaves (1).	1+1+1+1+1
	OR: Fibre helps digestion (1); Exercise strengthens heart (1); Clean air protects lungs (1); Water for kidneys (1); Avoid smoking (1).	1+1+1+1+1
20	Heart pumps (1); Arteries carry blood away (1); Veins return blood (1); Capillaries connect (1); Blood carries oxygen and nutrients (1).	1+1+1+1+1
	OR: Oxygen enters blood at lungs (1); Haemoglobin carries it (1); Cells use it (1); Carbon dioxide returns (1); Exhaled (1).	1+1+1+1+1

Mistakes to avoid:

- Saying that bile contains enzymes; bile only helps in digesting **fats** and is made by the liver.
- Writing that arteries carry blood to the heart and veins from the heart; it is exactly the **opposite**.
- Confusing ingestion, digestion, absorption and egestion, especially calling egestion 'excretion'.
- Mixing up breathing (taking air in and out) with respiration (release of energy from food in cells).
- Writing that the large intestine digests food; it mainly **absorbs water**.
- In the breathing movement, saying the diaphragm moves up during inhalation; it moves **down**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 8: **Life Processes in Animals** | Class 7 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** salivary amylase	It converts starch to sugar.
2	**(c)** anus	Rectum and anus.
3	**(d)** moves up and outwards	Chest expands.
4	**(a)** haemoglobin	It carries oxygen.
5	**(d)** food pipe (oesophagus)	Oesophagus.
6	**(b)** pancreas	Pancreatic juice.
7	**(b)** 15 to 18 times per minute	Normal rate.
8	**(c)** white blood cells	WBC.
9	**(b)** stomach	Stomach juices contain acid and pepsin.
10	**(c)** hydrochloric acid	HCl.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Removal of wastes (1); Done by kidneys (1).	1+1
12	Amylase: starch (1); Pepsin: proteins (1).	1+1
13	Arteries carry blood away from the heart (1); Veins carry blood to the heart (1).	1+1
14	Absorbs water (1); Passes out undigested food (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Air enters lungs (1); Oxygen enters blood (1); Blood carries it to cells (1).	1+1+1
16	Chew cud (1); Stomach has chambers (1); Microbes digest cellulose (1).	1+1+1
17	Digested food is used by cells (1); Gives energy (1); Builds new tissues (1).	1+1+1
	OR: Breathing is intake and release of air (1); Respiration releases energy from food (1); Respiration occurs in cells (1).	1+1+1
18	Blood passes into kidneys (1); Wastes are filtered (1); Urine collected in the bladder (1).	1+1+1
	OR: Urine becomes concentrated (1); Kidney stones possible (1); Drink plenty of water (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Plasma: carries food, wastes (1); RBC: oxygen (1); WBC: defence (1); Platelets: clotting (1); Temperature control (1).	1+1+1+1+1
	OR: All have mouth and canal (1); Digestive glands assist (1); Absorption in intestine (1); Waste out (1); Variations by diet (1).	1+1+1+1+1
20	Amoeba: pseudopodia, diffusion (1); Cockroach: spiracles and tracheae (1); Earthworm: skin (1); Fish: gills (1); All get oxygen (1).	1+1+1+1+1
	OR: Assimilation (1); Egestion (1); Energy for movement (1); For growth (1); For warmth (1).	1+1+1+1+1

Mistakes to avoid:

- Saying that bile contains enzymes; bile only helps in digesting **fats** and is made by the liver.
- Writing that arteries carry blood to the heart and veins from the heart; it is exactly the **opposite**.
- Confusing ingestion, digestion, absorption and egestion, especially calling egestion 'excretion'.
- Mixing up breathing (taking air in and out) with respiration (release of energy from food in cells).
- Writing that the large intestine digests food; it mainly **absorbs water**.
- In the breathing movement, saying the diaphragm moves up during inhalation; it moves **down**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
