- Saying that bile contains enzymes; bile only helps in digesting **fats** and is made by the liver.
- Writing that arteries carry blood to the heart and veins from the heart; it is exactly the **opposite**.
- Confusing ingestion, digestion, absorption and egestion, especially calling egestion 'excretion'.
- Mixing up breathing (taking air in and out) with respiration (release of energy from food in cells).
- Writing that the large intestine digests food; it mainly **absorbs water**.
- In the breathing movement, saying the diaphragm moves up during inhalation; it moves **down**.
