THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 8: **Life Processes in Animals** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. In body tissues, blood gains: 1

(a) carbon dioxide **(b)** oxygen **(c)** amylase **(d)** bile

2. After heavy exercise, muscles ache because: 1

(a) blood clots
(b) muscles are cold
(c) water is lost
(d) partial breakdown of glucose without oxygen forms lactic acid

3. An athlete's resting pulse is 60 per minute and a normal person's is 72. The athlete's heart: 1

(a) is weaker **(b)** beats more
(c) is smaller **(d)** beats less often but pumps more per beat

4. Which organ removes urea from the blood? 1

(a) stomach **(b)** lung **(c)** liver **(d)** kidney

5. The correct sequence for the flow of blood in a human from the heart is: 1

(a) capillaries, arteries
(b) arteries, heart, veins
(c) heart, veins, capillaries, arteries
(d) heart, aorta, arteries, capillaries, veins, heart

6. Which of the following correctly lists the blood vessels in order of size from the heart outward? 1

(a) aorta, arteries, capillaries **(b)** veins, capillaries
(c) capillaries, arteries, aorta **(d)** arteries, aorta, capillaries

7. Urine contains mainly: 1

(a) water, urea and salts **(b)** proteins
(c) sugar **(d)** blood cells

8. If the kidneys stop working, which waste collects in the blood? 1

(a) urea **(b)** starch **(c)** bile **(d)** oxygen

9. **Assertion (A):** The breathing rate increases during exercise. 1
Reason (R): The body needs more oxygen to release more energy during exercise.
Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** The small intestine is the main site of absorption of digested food. 1
Reason (R): The inner wall of the small intestine has many villi that increase the surface area.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is it unhealthy to eat very hot or very spicy food regularly? 2

12. Why should fruits be washed before eating? 2

13. Explain why blood must circulate continuously. 2

14. What is the difference between aerobic and anaerobic respiration? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain why a long-distance runner takes deep breaths. 3

16. Explain what the pulse rate tells us. 3

17. Suggest reasons for the breathlessness of a person with low haemoglobin. 3

OR

Compare digestion in the stomach and in the small intestine. 3

18. How does the structure of a capillary suit its function? 3

OR

Explain why we should not eat food from open stalls in rainy season. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** A doctor tells Mr Nair, who suffers from kidney stones, to drink plenty of water. He explains that the kidneys remove waste from the blood and that the waste leaves the body in a liquid form. 5
(i) Name the organ that filters waste from blood.
(ii) Name one waste substance present in urine.
(iii) How many kidneys does a human being have?
(iv) What would happen if both kidneys stopped working?

20. A patient's blood test shows low haemoglobin and low white cell count. Discuss possible effects and suggest remedies. 5

OR

Explain the energy changes in the body from the food we eat to the energy used in activity. 5

END OF QUESTION PAPER — Total: 40 Marks
