ANSWER KEY & MARKING SCHEME SET 1

Chapter 1: **Geographical Diversity of India** | Class 7 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** mountains, desert, coast	Relief changes
2	**(b)** lava rocks	Basaltic plateau
3	**(d)** region with little rain on the leeward side of mountains	Dry region
4	**(a)** slope in different directions and have a rift valley for the Narmada	Drainage patterns
5	**(b)** fertile land and water but risk of floods	Densely settled
6	**(c)** a group of islands	Andaman and Nicobar
7	**(a)** Northern Plains	Reliable water and fertile soil
8	**(a)** harsh climate and water scarcity	Environmental limits
9	**(a)** Both A and R are true and R is the correct explanation of A.	Alluvium laid down by rivers makes the soil fertile, so R explains A.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true, but naming the ranges does not explain why the Himalayas form the boundary.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Different geological processes (1); Plate movements and rivers (1).	1+1
12	Prevent soil erosion (1); Allow farming (1).	1+1
13	Store water (1); Habitat (1).	1+1
14	No glaciers (1); Depend on monsoon (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Source differs (1); Flow differs (1); Uses differ (1).	1+1+1
16	Monsoon (1); Slope (1); Rainfall variation (1).	1+1+1
17	Birds (1); Fishing (1); Tourism (1).	1+1+1
	OR: Plains dense (1); Mountains sparse (1); Desert sparse (1).	1+1+1
18	Rising sea (1); Cyclones (1); Coral bleaching (1).	1+1+1
	OR: Rice in plains (1); Millets in plateau (1); Fish in coasts (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) The Northern Plains (1). (ii) Alluvial soil (1). (iii) Himadri (1). (iv) The plains have flat, fertile alluvial land and water from rivers (1); the mountains have steep slopes, thin soil and cold weather, which limit farming (1).	1+1+1+2
20	Barrier (1); Monsoon (1); Rivers (1); Snowmelt (1); Floods (1).	1+1+1+1+1
	OR: Early settlements (1); Agriculture (1); Transport (1); Hydropower (1); Pollution (1).	1+1+1+1+1

Mistakes to avoid:

- Arranging the Himalayan ranges wrongly: from north to south they are **Himadri, Himachal and Shivalik**.
- Writing that Lakshadweep is volcanic; the islands are made of **coral (atolls)** in the Arabian Sea.
- Saying that peninsular rivers such as the Godavari flow into the Arabian Sea; they flow **west to east into the Bay of Bengal**.
- Mixing up the Ghats: the **Western Ghats** are tall and continuous, while the Eastern Ghats are broken.
- Forgetting why the Northern Plains are fertile: **alluvial soil deposited by rivers**.
- Writing that sand dunes are formed by rivers; they are shaped by **wind**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 1: **Geographical Diversity of India** | Class 7 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Himalayan slopes - apple orchards	Suitable economy
2	**(b)** steep slope	Relief
3	**(b)** receive more monsoon rain	Rain barrier effect
4	**(d)** it flows through a rift valley and ends in an estuary	Drainage
5	**(c)** high Himalayan zones	Harsh conditions
6	**(d)** frequent earthquakes and landslides	Tectonic activity
7	**(d)** gentle slope and heavy monsoon rain	Floodplains
8	**(b)** peninsular rivers depend mainly on rain	Sources vary
9	**(d)** A is false but R is true.	A is false, they are coral islands (atolls); R is true.
10	**(a)** Both A and R are true and R is the correct explanation of A.	Because the plateau slopes eastwards, the rivers flow east into the Bay of Bengal; R states the result of A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Lava origin (1); Retains moisture (1).	1+1
12	Temperature falls (1); Crops differ (1).	1+1
13	Wide plains (1); Narrow coast (1).	1+1
14	Rain falls on windward side (1); Leeward side is dry (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Windward rain (1); Leeward dry (1); Rivers originate (1).	1+1+1
16	Old rocks (1); Mineral formation (1); Mining areas (1).	1+1+1
17	Natural harbour (1); Hinterland (1); Trade (1).	1+1+1
	OR: Climate (1); Rivers (1); Defence (1).	1+1+1
18	Terraces (1); Crops (1); Animals (1).	1+1+1
	OR: Fertile land (1); Irrigation (1); High yields (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) The Peninsular (Deccan) Plateau (1). (ii) The Western Ghats (1). (iii) The Bay of Bengal (1). (iv) The plateau slopes from west to east (1); the Western Ghats keep the high ground near the west coast, so water drains eastwards (1).	1+1+1+2
20	Biodiversity (1); Rivers (1); Tourism (1); Threats (1); Measures (1).	1+1+1+1+1
	OR: Himalayas (1); Northern Plains (1); Peninsula (1); Coast (1); Islands (1).	1+1+1+1+1

Mistakes to avoid:

- Arranging the Himalayan ranges wrongly: from north to south they are **Himadri, Himachal and Shivalik**.
- Writing that Lakshadweep is volcanic; the islands are made of **coral (atolls)** in the Arabian Sea.
- Saying that peninsular rivers such as the Godavari flow into the Arabian Sea; they flow **west to east into the Bay of Bengal**.
- Mixing up the Ghats: the **Western Ghats** are tall and continuous, while the Eastern Ghats are broken.
- Forgetting why the Northern Plains are fertile: **alluvial soil deposited by rivers**.
- Writing that sand dunes are formed by rivers; they are shaped by **wind**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 1: **Geographical Diversity of India** | Class 7 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** afforestation and terracing	Conservation
2	**(d)** a sand bar	Coastal landform
3	**(b)** monsoon winds meet the hills	Orographic rain
4	**(c)** discontinuous low hills cut by rivers	Relief
5	**(b)** natural harbours and trade with the Arabian Sea	Maritime advantage
6	**(c)** low, rounded and worn-down peaks	Erosion
7	**(c)** it is made of ancient hard rocks	Gondwana
8	**(b)** terrace farming	Hill agriculture
9	**(d)** A is false but R is true.	A is false, dunes are shaped by wind; R is true.
10	**(c)** A is true but R is false.	A is true; R is false, the Western Ghats are higher and continuous while the Eastern Ghats are broken.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Plains easy (1); Mountains difficult (1).	1+1
12	Steep slopes (1); Cold climate (1).	1+1
13	Sea-level rise (1); Cyclones (1).	1+1
14	Transport (1); Water (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Water scarcity vs flood (1); Soil (1); Settlement (1).	1+1+1
16	Monsoon winds (1); Hills (1); Moist air (1).	1+1+1
17	Central in Indian Ocean (1); Trade routes (1); Climate (1).	1+1+1
	OR: Natural harbours (1); Ports (1); Fishing (1).	1+1+1
18	Pilgrimage (1); Trade (1); Culture (1).	1+1+1
	OR: Erosion (1); Landslides (1); Floods in plains (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Coral (1). (ii) Sand dunes (1). (iii) Over 7,500 km (1). (iv) It has mountains, plains, plateau, deserts, coasts and islands within one country (1); these differences affect climate, crops and the way of life in each region (1).	1+1+1+2
20	Cyclones (1); Sea-level rise (1); Mangroves (1); Coral (1); Policy (1).	1+1+1+1+1
	OR: Rainfall (1); Rivers (1); Species (1); Threats (1); Protection (1).	1+1+1+1+1

Mistakes to avoid:

- Arranging the Himalayan ranges wrongly: from north to south they are **Himadri, Himachal and Shivalik**.
- Writing that Lakshadweep is volcanic; the islands are made of **coral (atolls)** in the Arabian Sea.
- Saying that peninsular rivers such as the Godavari flow into the Arabian Sea; they flow **west to east into the Bay of Bengal**.
- Mixing up the Ghats: the **Western Ghats** are tall and continuous, while the Eastern Ghats are broken.
- Forgetting why the Northern Plains are fertile: **alluvial soil deposited by rivers**.
- Writing that sand dunes are formed by rivers; they are shaped by **wind**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
