- Confusing the windward side (heavy rain) with the **rain shadow** (leeward side, little rain).
- Naming the wrong coast for cyclones; the **eastern coast** (Bay of Bengal) is more cyclone-prone.
- Forgetting that the monsoon first reaches **Kerala in early June** and that monsoon comes from the Arabic **mausim**.
- Listing the wrong number of traditional seasons; India recognised **six ritus**, not four.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
