ANSWER KEY & MARKING SCHEME SET 1

Chapter 3: **Climates of India** | Class 7 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** 27 degrees C	Falls 6.5 degrees per 1,000 m
2	**(c)** cloud cover and rainfall reduce heating	Climate factors
3	**(b)** mangrove forests and early warnings	Natural barrier
4	**(c)** on the coast near the Equator	Low range
5	**(a)** more erratic with intense spells	Observed trend
6	**(d)** rise and range increase	Continentality
7	**(d)** delayed	Dependence
8	**(b)** high pressure over land in winter - dry winds from land	Seasonal winds
9	**(a)** Both A and R are true and R is the correct explanation of A.	R gives the rate of fall described in A.
10	**(a)** Both A and R are true and R is the correct explanation of A.	Moist winds shed their rain on the windward slope, so the leeward side stays dry.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Altitude differs (1); Distance from sea differs (1).	1+1
12	Reduce waves (1); Hold soil (1).	1+1
13	Temperature falls (1); Forest types change (1).	1+1
14	Rain-fed crops (1); Kharif cycle (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Agriculture (1); Prices (1); Power (1).	1+1+1
16	Crop output (1); Prices (1); Planning (1).	1+1+1
17	Blocking wind (1); Heat retention (1); Pollution (1).	1+1+1
	OR: Monsoon branch misses (1); Aravallis along it (1); Low humidity (1).	1+1+1
18	Height (1); East-west extent (1); Blocks winds (1).	1+1+1
	OR: Heat stroke (1); Vector diseases (1); Cold waves (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) It decreases (1). (ii) About 6.5 degrees C (1). (iii) Shimla (1). (iv) About 2 x 6.5 = 13 degrees C (1); height lowers the temperature, so Shimla is colder (1).	1+1+1+2
20	Mechanism (1); Onset (1); Variability (1); Droughts and floods (1); Adaptation (1).	1+1+1+1+1
	OR: Monsoon changes (1); Heat (1); Sea level (1); Cyclones (1); Adaptation (1).	1+1+1+1+1

Mistakes to avoid:

- Writing the rate of fall of temperature with height wrongly; it is about **6.5 degrees C per 1,000 m**.
- Saying the sea raises the temperature range; coastal places have a **smaller** range because of the sea's moderating effect.
- Confusing the windward side (heavy rain) with the **rain shadow** (leeward side, little rain).
- Naming the wrong coast for cyclones; the **eastern coast** (Bay of Bengal) is more cyclone-prone.
- Forgetting that the monsoon first reaches **Kerala in early June** and that monsoon comes from the Arabic **mausim**.
- Listing the wrong number of traditional seasons; India recognised **six ritus**, not four.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 2

Chapter 3: **Climates of India** | Class 7 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** Delhi	Inland north
2	**(c)** the monsoon is influenced by many global factors	Variability
3	**(c)** variability of monsoon	Uneven rainfall
4	**(c)** Odisha	Puri is in Odisha
5	**(a)** rainwater harvesting and drought-resistant crops	Resilience
6	**(a)** they lower temperatures and reduce heat islands	Cooling
7	**(d)** a dry spell during the rainy season	Weak monsoon period
8	**(a)** flooding and salt intrusion	Risk
9	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true, but the origin of the word does not explain the date of arrival.
10	**(d)** A is false but R is true.	A is false, coastal places have a smaller range; R is true.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Rain differs each year (1); Unequal distribution (1).	1+1
12	Snow slides (1); Rain runs (1).	1+1
13	Outdoor work (1); Few cooling facilities (1).	1+1
14	Warm Bay of Bengal (1); Shallow waters (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Temperature (1); Rain (1); Vegetation (1).	1+1+1
16	Storm buffer (1); Carbon store (1); Habitat (1).	1+1+1
17	Crop choice (1); Irrigation (1); Insurance (1).	1+1+1
	OR: Warmer seas (1); Stronger storms (1); Coastal risk (1).	1+1+1
18	SMS alerts (1); Apps (1); Reach of farmers (1).	1+1+1
	OR: Harvesting (1); Drought-resistant crops (1); Water-saving (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) The south-west monsoon winds (1). (ii) Early June (1). (iii) The rain shadow area (1). (iv) Winds drop most of their moisture on the windward slope of the Ghats (1); little moisture remains for the leeward Deccan side (1).	1+1+1+2
20	Green cover (1); Water bodies (1); Cool roofs (1); Transport (1); Policies (1).	1+1+1+1+1
	OR: Monthly data (1); Seasons (1); Range (1); Rain pattern (1); Conclusion (1).	1+1+1+1+1

Mistakes to avoid:

- Writing the rate of fall of temperature with height wrongly; it is about **6.5 degrees C per 1,000 m**.
- Saying the sea raises the temperature range; coastal places have a **smaller** range because of the sea's moderating effect.
- Confusing the windward side (heavy rain) with the **rain shadow** (leeward side, little rain).
- Naming the wrong coast for cyclones; the **eastern coast** (Bay of Bengal) is more cyclone-prone.
- Forgetting that the monsoon first reaches **Kerala in early June** and that monsoon comes from the Arabic **mausim**.
- Listing the wrong number of traditional seasons; India recognised **six ritus**, not four.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

ANSWER KEY & MARKING SCHEME SET 3

Chapter 3: **Climates of India** | Class 7 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** warm, wet climate	Suitable conditions
2	**(d)** they release heat outdoors	Heat transfer
3	**(d)** India has many climatic regions due to its size and relief	Diversity
4	**(a)** they can differ over short distances	Local variation
5	**(d)** cyclones bring storm surges and strong winds	Safety
6	**(d)** millets need less water	Suitability
7	**(b)** north-east monsoon brings rain to its coast	Retreating monsoon
8	**(d)** drier	Rain shadow
9	**(c)** A is true but R is false.	A is true; R is false, heat waves occur in the north-west plains and not in the island climate of Lakshadweep.
10	**(a)** Both A and R are true and R is the correct explanation of A.	Their height blocks the cold winds, which explains A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Cool wind (1); Land cools (1).	1+1
12	Energy source (1); Moisture (1).	1+1
13	Reflect sunlight (1); Cut heat (1).	1+1
14	Rain shadow (1); Water-intensive crops (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Local observation (1); Cultural link (1); Modern relevance (1).	1+1+1
16	Monsoon climate (1); Summer heat (1); Dry winter (1).	1+1+1
17	Better forecasting (1); Evacuation (1); Shelters (1).	1+1+1
	OR: Early warning (1); Water harvesting (1); Embankments (1).	1+1+1
18	Regions (1); Season (1); Rain amount (1).	1+1+1
	OR: Weak monsoon (1); Lower yields (1); Higher prices (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Monsoon failure (1). (ii) The eastern coast (1). (iii) Six (1). (iv) Much Indian farming depends on monsoon rain (1); a poor monsoon reduces crops and income, and can cause drought (1).	1+1+1+2
20	Ritus (1); Folk signs (1); Satellites (1); Models (1); Use (1).	1+1+1+1+1
	OR: Ladakh (1); Kerala (1); Rajasthan (1); Houses and food (1); Occupations (1).	1+1+1+1+1

Mistakes to avoid:

- Writing the rate of fall of temperature with height wrongly; it is about **6.5 degrees C per 1,000 m**.
- Saying the sea raises the temperature range; coastal places have a **smaller** range because of the sea's moderating effect.
- Confusing the windward side (heavy rain) with the **rain shadow** (leeward side, little rain).
- Naming the wrong coast for cyclones; the **eastern coast** (Bay of Bengal) is more cyclone-prone.
- Forgetting that the monsoon first reaches **Kerala in early June** and that monsoon comes from the Arabic **mausim**.
- Listing the wrong number of traditional seasons; India recognised **six ritus**, not four.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
