THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 3: **Climates of India** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which of these is a climatic factor responsible for tea cultivation in Assam? 1

(a) warm, wet climate **(b)** frost

(c) no rain **(d)** desert

2. The wide use of air conditioners in cities increases heat island effect because 1

(a) they stop wind **(b)** they cause rain

(c) they cool the outdoors **(d)** they release heat outdoors

3. A student says that India has only one climate. A good reply is 1

(a) India is one climate

(b) India has the polar climate

(c) India has no climate

(d) India has many climatic regions due to its size and relief

4. Which of these statements is correct about microclimates? 1

(a) they can differ over short distances **(b)** they exist only in deserts

(c) they are the same as national climate **(d)** they never change

5. Why do coastal states prepare cyclone shelters? 1

(a) droughts occur

(b) monsoon is weak

(c) snow is heavy

(d) cyclones bring storm surges and strong winds

6. A farmer chooses millet over paddy in a low-rainfall region because 1

(a) millets need more water **(b)** paddy is drought tolerant

(c) paddy is cheaper **(d)** millets need less water

7. Which of these best explains why Chennai gets more rain in October-December than in June-August? 1

(a) it is on the Ghats

(b) north-east monsoon brings rain to its coast

(c) no reason

(d) south-west monsoon is strong

8. If a mountain range lies north-south across a wind from the west, the eastern side will be 1

(a) the same **(b)** colder always **(c)** wetter **(d)** drier

9. **Assertion (A):** Heat waves are common in Rajasthan, Punjab and Haryana. 1
Reason (R): Heat waves are common in Lakshadweep.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** The Himalayas protect India from the cold winds of Central Asia. 1
Reason (R): The Himalayas are a high mountain barrier.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How does a land breeze affect nights at the coast? 2

12. Why do cyclones need warm sea water? 2

13. Why do cities need cool roofs? 2

14. Why are droughts severe in Marathwada? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Evaluate the traditional six-season classification. 3

16. Interpret a climograph: rainfall peaks June-Sept, temperature highest in May. 3

17. Examine why cyclone deaths have fallen in recent decades. 3

OR

Analyse how drought and flood management can be improved. 3

18. Compare the effects of south-west and north-east monsoons. 3

OR

Evaluate the impact of El Nino on Indian agriculture. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** A farmer in Maharashtra waited for the monsoon, but the rains were far below normal this year. Wells dried up and crops withered. Meanwhile, a cyclone crossed the east coast of India and affected villages in Odisha with strong winds and heavy rain. 5
(i) What is the term for the much-lower-than-normal monsoon rainfall?
(ii) Which coast of India is more prone to cyclones?
(iii) How many ritus (seasons) did traditional India recognise?
(iv) Why is the monsoon so important for Indian farmers?

20. Explain how the traditional knowledge and scientific forecasts can complement each other. 5

OR

Evaluate how people's lifestyles reflect climate in Ladakh, Kerala and Rajasthan. 5

END OF QUESTION PAPER — **Total: 40 Marks**
