THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SOCIAL SCIENCE · HARD LEVEL UNIT TEST SET 2

Chapters 1–4: **Geographical Diversity of India, Understanding the Weather, Climates of India, India's Sacred Land: Pilgrimage and Sacred Geography** | RBSE Pattern | Session 2026–27

Time: 2 Hours Name: _____ Roll No.: _____ **Maximum Marks: 50**

General Instructions:

1. All questions are compulsory.
2. Q. 1–15 are Objective Type (1 mark each).
3. Q. 16–20 are Very Short Answer Type (2 marks each).
4. Q. 21–25 are Short Answer Type (3 marks each).
5. Q. 26–27 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 24–25 and Q. 26–27.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 15 × 1 = 15

Choose the correct option and write it in your answer book.

1. Which statement best explains why sacred groves conserve biodiversity? 1

(a) they are in cities
(b) they are in deserts
(c) they are fenced by law only
(d) cultural taboos restrict use of resources

2. Which statement explains the high population in the Ganga delta? 1

(a) fertile land and water but risk of floods
(b) harsh desert
(c) lack of rivers
(d) glaciers

3. Why might a cloudy night be warmer than a clear night? 1

(a) clouds reflect cold **(b)** clouds remove heat
(c) clouds create wind **(d)** clouds trap outgoing heat

4. Climate change is likely to make the monsoon 1

(a) non-existent **(b)** cooler
(c) more erratic with intense spells **(d)** perfectly steady

5. What explains similar sacred mountain beliefs among the Greeks, Maori and Indians? 1

(a) humans across cultures revere awe-inspiring nature
(b) they traded with each other
(c) they were neighbours
(d) they used the same language

6. An archipelago is 1

(a) a lake **(b)** a desert
(c) a group of islands **(d)** a single island

7. A drop in temperature of about 6.5 degrees C per 1,000 m height means a hill station at 2,000 m is cooler than the plain by about 1

(a) 13 degrees C **(b)** 26 degrees C **(c)** 6.5 degrees C **(d)** 2 degrees C

8. If the sea were not near Mumbai, its summer temperatures would probably 1

(a) fall **(b)** remain same
(c) become zero **(d)** rise and range increase

9. Which is a long-term benefit of treating mountains as sacred? 1

(a) more roads
(b) conservation of forests and water sources
(c) more mining
(d) more waste

10. A farmer wants to grow wheat with irrigation from perennial rivers. The best region is 1

(a) Ladakh **(b)** Northern Plains **(c)** Lakshadweep **(d)** Thar Desert

11. A barometer reading falls from 1010 to 995 millibars in a day. This most likely means 1

(a) a storm is approaching **(b)** a flood
(c) fair weather **(d)** no change

12. If the south-west monsoon is late by three weeks, kharif sowing will be 1

(a) unaffected **(b)** delayed **(c)** earlier **(d)** doubled

13. **Assertion (A):** Bodh Gaya is a sacred place for Buddhists. 1
Reason (R): The Buddha attained enlightenment at Bodh Gaya, where the Mahabodhi Temple stands.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

14. **Assertion (A):** The Himalayas form the northern boundary of India. 1
Reason (R): Himadri, Himachal and Shivalik are the three parallel ranges of the Himalayas.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

15. **Assertion (A):** Mean daily temperature is calculated as (maximum + minimum) / 2. 1
Reason (R): Rainfall is measured with a rain gauge.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) 5 × 2 = 10

Answer in about 20–30 words each.

16. Why is Earth heated unevenly? 2

17. How do mangroves protect the coast? 2

18. How are sacred groves linked to water? 2

19. Why are wetlands important? 2

20. Why is forecasting more difficult in the tropics? 2

SECTION — C (Short Answer Type) — 5 × 3 = 15

Answer in about 40–60 words each.

21. Evaluate management strategies for crowded pilgrimage sites. 3

22. Explain the significance of wetlands such as Chilika. 3

23. Evaluate how cyclone warnings help coastal communities. 3

24. Examine why high-rise urban areas modify local winds. 3

OR

Assess whether sacred places are 'public goods'. 3

25. Analyse how relief affects population distribution. 3

OR

Analyse why the humidity and temperature together affect comfort. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

26. **Case study.** A school weather club in Jaipur records the temperature each day. On one day the maximum temperature was 38 degrees C and the minimum was 24 degrees C. The students also fix a rain gauge in the playground, which collected 16 mm of rain after a storm. 5

(i) Calculate the mean daily temperature.

(ii) What does the rain gauge measure?

(iii) Name the instrument used to measure temperature.

(iv) Why do weather stations keep records of the maximum and minimum temperature?

27. Evaluate the influence of climate on settlement patterns in India. 5

OR

Explain how sacred rivers, hills and trees support ecological balance. 5
