THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SOCIAL SCIENCE · HARD LEVEL UNIT TEST SET 3

Chapters 1–4: **Geographical Diversity of India, Understanding the Weather, Climates of India, India's Sacred Land: Pilgrimage and Sacred Geography** | RBSE Pattern | Session 2026–27

Time: 2 Hours Name: _____ Roll No.: _____ **Maximum Marks: 50**

General Instructions:

1. All questions are compulsory.
2. Q. 1–15 are Objective Type (1 mark each).
3. Q. 16–20 are Very Short Answer Type (2 marks each).
4. Q. 21–25 are Short Answer Type (3 marks each).
5. Q. 26–27 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 24–25 and Q. 26–27.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 15 × 1 = 15

Choose the correct option and write it in your answer book.

1. Which pair describes a correct cause-effect? 1

(a) low pressure in winter - monsoon
(b) high pressure over the sea in summer - heavy snowfall
(c) high pressure over land in winter - dry winds from land
(d) low pressure over sea in summer - snow

2. Which statement correctly describes tirtha? 1

(a) only a mountain **(b)** only a river
(c) place of crossing to a higher state **(d)** only a city

3. Mangroves along the Sundarbans protect the coast from 1

(a) droughts **(b)** earthquakes
(c) storms and erosion **(d)** glaciers

4. Which of the following is an example of using weather knowledge in agriculture? 1

(a) selecting crops suited to the rainfall **(b)** using no water
(c) ignoring seasons **(d)** sowing at any time

5. How does the Himalayan barrier influence the winter climate of north India? 1

(a) causes cyclone **(b)** brings snow storms to the plains
(c) causes heat waves **(d)** blocks very cold Central Asian winds

6. If pilgrim numbers triple and facilities do not change, the most likely result is 1

(a) cleaner sites **(b)** crowding, waste and risk
(c) fewer sales **(d)** better services

7. Coral islands like Lakshadweep are low-lying. The main threat from climate change is 1

(a) glaciers **(b)** volcanoes
(c) rising sea levels **(d)** earthquakes

8. A mountaineer finds boiling water takes longer to cook rice. This is because 1

(a) pressure is high
(b) no water
(c) pressure is low and water boils at a lower temperature
(d) it is hot

9. A station has 3,000 mm rain at the windward Ghats and 600 mm at Pune. The difference is mainly due to 1

(a) rain-shadow effect **(b)** latitude
(c) ocean currents **(d)** glaciers

10. The overlapping of pilgrimage and trade routes suggests 1

(a) religion banned trade
(b) the economy and religion were intertwined
(c) they were unrelated
(d) trade banned religion

11. Which pairing of region and activity is best? 1

(a) Lakshadweep - wheat **(b)** Himalayan slopes - apple orchards
(c) Ladakh - jute **(d)** Thar - rice paddies

12. A city shows a rise in mean night temperatures over decades. A likely cause is 1

(a) urban heat island and climate change **(b)** fewer buildings
(c) more lakes **(d)** more forests

13. **Assertion (A):** The Deccan interior behind the Western Ghats receives less rain. 1
Reason (R): It lies in the rain shadow of the Western Ghats.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

14. **Assertion (A):** The Kumbh Mela is held at four places. 1
Reason (R): Its legend is linked to the churning of the ocean (amrita manthana), when drops of nectar fell at four places.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

15. **Assertion (A):** The Lakshadweep islands are volcanic islands. 1
Reason (R): Lakshadweep lies in the Arabian Sea.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) 5 × 2 = 10

Answer in about 20–30 words each.

16. How does altitude change vegetation? 2

17. What is carrying capacity? 2

18. Why are peninsular rivers rain-fed? 2

19. Why do isobars close together mean strong wind? 2

20. How does the monsoon unite India's agriculture? 2

SECTION — C (Short Answer Type) — 5 × 3 = 15

Answer in about 40–60 words each.

21. Analyse the causes of the Thar's aridity. 3

22. Analyse why pilgrimage routes shaped trade networks. 3

23. Examine the effects of climate change on coasts and islands. 3

24. Assess the role of satellites in modern forecasting. 3

OR

Explain how the location of the Himalayas makes them a climatic barrier. 3

25. Examine the idea of land as divine in Indian thought and its impact on environment. 3

OR

Analyse the role of geography in shaping food habits. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

26. **Case study.** Rohan travels from Shimla at 2,000 m above sea level to a town in the plains at about sea level. In Shimla the morning temperature was 10 degrees C. He notices that in the plains it is much warmer, though both places lie in the same region. 5

(i) What happens to temperature as altitude increases?

(ii) By roughly how many degrees C does it fall per 1,000 m?

(iii) Which place is likely to be colder, Shimla or the plains town?

(iv) Calculate the expected fall in temperature between the plains town and Shimla, and say why this explains Rohan's observation.

27. Examine the monsoon system, its variability and its consequences for farmers and cities. 5

OR

Discuss the relationship between faith, conservation and development with reference to sacred groves and Niyam Dongar. 5

END OF QUESTION PAPER — Total: 50 Marks
