THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 1

Chapter 1: **The Wonderful World of Science** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A student claims that heavier objects fall faster. A good way to test it is to: 1

(a) ask ten friends
(b) look at pictures
(c) drop objects of different masses from the same height
(d) wait for rain

2. Priya's plants kept in a dark cupboard became pale. The conclusion is: 1

(a) plants like cupboards **(b)** soil is not needed
(c) water is harmful **(d)** plants need light for healthy growth

3. Why should a scientist note the unit with each measurement? 1

(a) The number alone has no meaning without it
(b) Units make it larger
(c) Units are optional
(d) Units look nice

4. To test whether seeds need water to germinate, which variable should be changed? 1

(a) the presence of water
(b) the colour of the pot
(c) the type of seed, water and light all together
(d) the day of the week

5. Which of these helps make the measurement of a pencil's length more accurate? 1

(a) placing the ruler's zero mark at one end and reading straight on
(b) guessing
(c) reading from the side
(d) measuring from a broken end

6. Rohan reads a ruler from an angle and gets a wrong value. This error can be avoided by: 1

(a) using a bent ruler **(b)** keeping the eye directly above the mark
(c) reading faster **(d)** guessing

7. In a fair test on the effect of fertiliser on plant growth, which should be the same for all plants? 1

(a) the date of noting **(b)** nothing
(c) amount of water and sunlight **(d)** amount of fertiliser

8. What does a stethoscope help doctors do? 1

(a) weigh patients **(b)** measure temperature
(c) see bacteria **(d)** listen to heartbeats

9. A student changes both the amount of water and sunlight in an experiment on plant growth. Why is the test unfair? 1

(a) water is harmful
(b) sunlight is not needed
(c) two things changed at once, so the cause is unclear
(d) it is too easy

10. Which of the following correctly orders the steps? 1

(a) conclusion, experiment, hypothesis, observation
(b) experiment, observation, conclusion, hypothesis
(c) observation, hypothesis, experiment, conclusion
(d) hypothesis, conclusion, observation, experiment

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is it important to change only one variable in an experiment? 2

12. How does a telescope help astronomers? 2

13. What is the difference between a prediction and an observation? 2

14. A student says 'The Sun goes around the Earth because it moves across the sky'. Is this a good conclusion? Why? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Design an experiment to test the hypothesis 'Seeds sprout faster in warm places'. 3

16. Describe how a fair test can be set up to find which paper towel absorbs the most water. 3

17. Why is it unsafe to repeat an experiment without knowing the risks? 3

OR

Why should you not accept a claim just because many people believe it? 3

18. Explain how the observation of a wet road may lead to different inferences. 3

OR

How does the use of instruments improve the study of nature? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Plan an investigation to find whether the length of a pendulum affects the time of its swing. Mention the variables. 5

OR

Rahul measured the length of his desk four times and got 120 cm, 121 cm, 119 cm and 120 cm. What is the best value? Why repeat? 5

20. Explain how a hypothesis is formed, tested and accepted or rejected. Use the example of 'Plants need sunlight'. 5

OR

Why is it important to follow safety rules? Explain with five examples of precautions and reasons. 5

END OF QUESTION PAPER — Total: 40 Marks
