THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 1: **The Wonderful World of Science** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. C.V. Raman's work on the scattering of light began with his curiosity about why the sea looks blue. This shows that: 1

(a) curiosity about everyday things can lead to great discoveries
(b) great discoveries need no observation
(c) only costly equipment can lead to discoveries
(d) experiments are unnecessary in science

2. In a graph of plant height against days, a steady upward line shows: 1

(a) the plant is not changing **(b)** the plant grows with time
(c) the soil is dry **(d)** the plant is shrinking

3. A farmer sees insects on her crop and uses neem spray on half of the field. What is the control in this test? 1

(a) the neem tree **(b)** the neighbours' field
(c) the sprayed half **(d)** the half field not sprayed

4. A conclusion is 'valid' when: 1

(a) it is liked by many
(b) it is stated confidently
(c) it is old
(d) it follows from the data collected under fair conditions

5. Which of the following best explains why instruments give better data than senses? 1

(a) they are bigger
(b) they cost more
(c) they are colourful
(d) they can measure precisely and consistently

6. Which type of evidence would a scientist trust most? 1

(a) an advertisement
(b) a rumour
(c) repeated measurements by different people
(d) a single story

7. Which of these is an example of a quantitative observation? 1

(a) The rod looks shiny **(b)** The rod is nice
(c) The rod is 25 cm long **(d)** The rod feels smooth

8. A scientist writes a report with all details so that others can repeat the work. This supports: 1

(a) delay **(b)** secrecy **(c)** verification **(d)** rumour

9. Why do scientists use many different instruments? 1

(a) to make labs crowded
(b) to confuse students
(c) no single instrument can measure everything
(d) to waste money

10. Which of these is a qualitative observation? 1

(a) The solution has a volume of 50 mL **(b)** The solution has a mass of 60 g
(c) It was heated for 5 min **(d)** The solution is blue

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Explain why one example is not enough to prove a general statement. 2

12. A student claims a medicine works because he felt better after taking it. Why is this weak evidence? 2

13. A student's results for dissolving time were 12 s, 14 s, 13 s. Find the average time and explain why averages are used. 2

14. How does repeated measurement help to find a mistake in data? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain why correlation is not always causation using an example. 3

16. What makes a question scientific? Give one scientific and one non-scientific question. 3

17. How are the senses and instruments both used in the study of a flower? 3

OR

List the possible reasons for getting different results when the same experiment is done by two students. 3

18. Why do the early scientists such as Aryabhata and Sushruta remain relevant to us? 3

OR

Describe the role of honesty and teamwork in science with examples. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Evaluate the claim 'Plants talk to each other'. Describe how scientists would test it and what makes a claim acceptable. 5

OR

Discuss the advantages and the harmful effects of technology, giving three of each, and how science can address the harms. 5

20. Discuss how new technology such as the telescope or the microscope changed human understanding of nature. 5

OR

Assess the statement 'Science has all the answers'. Support your answer with three reasons. 5

END OF QUESTION PAPER — Total: 40 Marks
