THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 1

Chapter 4: **Exploring Magnets** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A material that is attracted by a magnet is called: 1

(a) transparent **(b)** insulator **(c)** non-magnetic **(d)** magnetic

2. The needle of a magnetic compass is a: 1

(a) small magnet **(b)** piece of glass **(c)** piece of plastic **(d)** piece of wood

3. Why are bar magnets stored in pairs with opposite poles side by side and iron pieces (keepers) across the ends? 1

(a) to keep them from losing magnetism **(b)** to make them heavier

(c) to rust them **(d)** to cool them

4. Which of these is attracted by a magnet? 1

(a) rubber band **(b)** wooden spoon **(c)** plastic ruler **(d)** iron nail

5. A magnetic compass needle always rests pointing: 1

(a) randomly **(b)** upward **(c)** east-west **(d)** north-south

6. Magnets should be kept away from: 1

(a) mobile phones and credit cards **(b)** pillows

(c) books **(d)** chairs

7. Which of these is non-magnetic? 1

(a) iron key **(b)** nickel coin piece

(c) steel pin **(d)** glass marble

8. The shape of a magnet that is bent in a 'U' is called: 1

(a) cylindrical magnet **(b)** ring magnet

(c) horseshoe magnet **(d)** bar magnet

9. A magnetic compass is used by: 1

(a) sailors **(b)** chefs **(c)** potters **(d)** weavers

10. The regions near the ends of a magnet where attraction is strongest are called: 1

(a) centres **(b)** edges **(c)** faces **(d)** poles

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Name three magnetic and three non-magnetic materials. 2

12. Why does a freely suspended bar magnet point north-south? 2

13. Why do we place keepers across the poles of stored magnets? 2

14. What are the poles of a magnet? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. How would you separate iron nails from a mixture of iron nails and wooden pieces? 3

16. State three precautions for keeping magnets. 3

17. How do iron filings help us find the poles of a magnet? 3

OR

Describe how to find the poles of an unmarked magnet using a compass. 3

18. Explain the difference between magnetic and non-magnetic materials with examples. 3

OR

Why does the magnetic compass needle not point to the north exactly in the presence of a magnet nearby? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe an activity to classify materials as magnetic and non-magnetic. Give five examples of each. 5

OR

What is a magnetic compass? Describe its parts and how to use it to find directions. 5

20. Explain how the Earth acts as a magnet and how a magnetic compass uses this. 5

OR

Describe an activity to show that the poles are the strongest parts of a bar magnet, using iron filings. 5

END OF QUESTION PAPER — Total: 40 Marks
