THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 1

Chapter 5: **Measurement of Length and Motion** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The SI unit of length is the: 1

(a) centimetre **(b)** metre **(c)** kilometre **(d)** foot

2. To measure the length of a curved line, we can use a: 1

(a) balance **(b)** magnet **(c)** clock **(d)** thread

3. A body is said to be in motion when its position: 1

(a) is shiny **(b)** changes with time

(c) remains the same **(d)** is unknown

4. 1 metre equals: 1

(a) 1 centimetre **(b)** 10 centimetres **(c)** 100 centimetres **(d)** 1000 centimetres

5. While reading a scale, the eye should be: 1

(a) far to the left of the mark **(b)** below the scale

(c) at an angle to the mark **(d)** directly above the mark

6. A passenger sitting in a moving train is at rest with respect to: 1

(a) the stations **(b)** trees outside

(c) the platform **(d)** the seat of the train

7. 1 kilometre equals: 1

(a) 10 metres **(b)** 1000 metres **(c)** 100 metres **(d)** 10000 metres

8. An error in reading due to the wrong position of the eye is called: 1

(a) unit error **(b)** rounding error **(c)** zero error **(d)** parallax error

9. A tree appears to move backward to a person in a moving bus because: 1

(a) the tree is moving **(b)** the person is moving

(c) the road is moving **(d)** the wind is blowing

10. 1 centimetre equals: 1

(a) 1000 millimetres **(b)** 100 millimetres **(c)** 10 millimetres **(d)** 1 millimetre

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why do we need standard units of measurement? 2

12. How can you measure the length of a curved path such as a coastline map? 2

13. Why are cubit and handspan not reliable units? 2

14. Convert 2.5 m into centimetres. 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. List the steps for measuring the length of a pencil correctly. 3

16. Why should we avoid using a broken ruler by reading from its end? 3

17. Write three precautions when using a scale. 3

OR

Express 4 km 250 m in metres. 3

18. What are the problems with measuring using body parts? 3

OR

Explain how the measurement units developed in ancient times. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe different types of motion with two examples of each. 5

OR

Describe how to find the thickness of one sheet of paper if 100 sheets together measure 1.2 cm. 5

20. Explain how to measure the length of a curved line and the circumference of a bottle using a thread and scale. 5

OR

Describe the history of length measurement: cubit, foot, pace, and the metre. 5

END OF QUESTION PAPER Total: 40 Marks
