THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 7: **Temperature and its Measurement** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A clinical thermometer reads 41 °C. The person should: 1

(a) take a cold bath **(b)** see a doctor immediately
(c) continue school normally **(d)** wait a week before telling anyone

2. Why can a clinical thermometer not be used outside 35-42 °C? 1

(a) it is made of plastic **(b)** it is designed for body range
(c) it has no scale **(d)** it is too big

3. Why do birds fluff their feathers in winter? 1

(a) to drink **(b)** to eat **(c)** to trap air **(d)** to fly

4. Which scale marks are found on the thermometer in a refrigerator? 1

(a) 200 °C **(b)** only 100 °C
(c) below and above 0 °C **(d)** only 37 °C

5. Which thermometer is best to measure the temperature of boiling water? 1

(a) laboratory thermometer **(b)** clinical thermometer
(c) a thermometer meant for the body **(d)** a digital clinical thermometer

6. In which case is heat flow faster? 1

(a) across a wooden rod **(b)** across a plastic rod
(c) across a rubber rod **(d)** across a metal rod

7. If a thermometer reads 0 °C in melting ice, then in boiling water it should read: 1

(a) 100 °C **(b)** 37 °C **(c)** 50 °C **(d)** 0 °C

8. A thermometer reads 0 °C when placed in: 1

(a) melting ice **(b)** warm water **(c)** sunlight **(d)** boiling water

9. Which of these should be used for the cover of a hot-water jug? 1

(a) plastic **(b)** aluminium foil **(c)** iron **(d)** copper

10. What is the effect of adding ice to water in a glass? 1

(a) becomes steam **(b)** temperature of water falls
(c) no change **(d)** temperature rises

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why do pots have thick metal bases? 2

12. Explain why a metal spoon feels cold in the fridge when touched. 2

13. What happens to the temperature of a hot object placed in cold water? 2

14. How can you tell whether a fever has increased? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain why we should read the thermometer after the mercury level becomes steady. 3

16. How do you check the accuracy of a thermometer using ice and boiling water? 3

17. Explain why igloos are warm inside. 3

OR

Why do the vessels used for boiling have flat bases of metal? 3

18. Why should a person with fever be checked with a thermometer rather than by touching the forehead? 3

OR

Why is the handle of a frying pan made of wood or plastic? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Discuss the importance of recording temperature in daily life: weather, health and cooking. 5

OR

Explain how winter clothes, quilts and tea cosies all use the same principle. 5

20. Explain how to measure the temperature of a cup of milk. 5

OR

Describe the construction of a thermos flask and how it reduces heat transfer by conduction. 5

END OF QUESTION PAPER — Total: 40 Marks
