THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 2

Chapter 2: **Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. An organism made of many cells is called: 1

(a) unicellular **(b)** acellular **(c)** multicellular **(d)** single-celled

2. Cells in the human body differ in shape and size because: 1

(a) of the temperature **(b)** their functions differ

(c) all cells copy each other **(d)** they are of different species

3. A feature present in plant cells but absent in animal cells is: 1

(a) nucleus **(b)** cytoplasm **(c)** cell membrane **(d)** cell wall

4. Bacteria differ from plant and animal cells because they lack a: 1

(a) genetic material **(b)** cytoplasm

(c) well-defined nucleus **(d)** cell membrane

5. The shape of nerve cells is long and branched. This helps them to: 1

(a) carry messages over long distances **(b)** store food

(c) make oxygen **(d)** digest food

6. Which cell organelle contains chlorophyll? 1

(a) cytoplasm **(b)** vacuole **(c)** chloroplast **(d)** nucleus

7. Which of the following is a unicellular organism? 1

(a) mango tree **(b)** Paramecium **(c)** earthworm **(d)** hen

8. Red blood cells have no nucleus. Their main role is: 1

(a) digesting food **(b)** carrying oxygen

(c) making hormones **(d)** making antibodies

9. A thin onion peel is stained with iodine or safranin before viewing under a microscope because: 1

(a) stain makes the peel thicker **(b)** stain increases the number of cells

(c) stain makes the cell parts easier to see **(d)** stain makes the cells divide

10. Yeast is a: 1

(a) alga that has chlorophyll **(b)** multicellular plant

(c) unicellular fungus **(d)** virus

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is an onion peel stained before observation under a microscope? 2

12. Name the levels of organisation in a multicellular organism in the correct order. 2

13. Name two organelles/parts found in plant cells but not in animal cells. 2

14. Why do different cells in the body have different shapes? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how a microscope is helpful in studying the invisible world. 3

16. Give three characteristics of bacteria. 3

17. Name the three groups of organisms that are mostly unicellular and one example for each. 3

OR

What are the parts of a cell? State the function of any three parts. 3

18. How do viruses differ from bacteria? Give three points. 3

OR

How does a multicellular organism develop from a single cell? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe how van Leeuwenhoek and Hooke contributed to the discovery of the invisible world. 5

OR

Explain how the compound microscope works and how to calculate the total magnification. Give an example. 5

20. Compare unicellular and multicellular organisms with respect to body structure, division of labour and examples. 5

OR

Why are yeast and mushrooms called fungi? Mention three features and two uses. 5

END OF QUESTION PAPER — Total: 40 Marks
