THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 3

Chapter 2: **Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which of the following is the smallest cell? 1

(a) bacterial cell **(b)** ostrich egg **(c)** human egg **(d)** nerve cell

2. The jelly-like substance filling a cell between membrane and nucleus is: 1

(a) chloroplast **(b)** cytoplasm **(c)** cell wall **(d)** nucleoid

3. Which are the smallest of the living cells, found almost everywhere including soil, water and inside our bodies? 1

(a) protozoa **(b)** mushrooms **(c)** algae **(d)** bacteria

4. Plant cell chloroplasts help in: 1

(a) respiration only **(b)** storage of water **(c)** photosynthesis **(d)** cell division

5. Amoeba is an example of a: 1

(a) unicellular organism **(b)** multicellular animal
(c) tissue **(d)** multicellular plant

6. Which of the following needs a living host cell to multiply? 1

(a) virus **(b)** bacterium **(c)** yeast **(d)** amoeba

7. Microorganisms that cause disease are called: 1

(a) hosts **(b)** pathogens **(c)** decomposers **(d)** vectors

8. Cheek cells scraped from the inside of the mouth show: 1

(a) large chloroplasts **(b)** no cell wall
(c) a large central vacuole **(d)** a thick cell wall

9. Mushrooms, moulds and yeasts belong to the group of: 1

(a) bacteria **(b)** fungi **(c)** viruses **(d)** protozoa

10. The smallest unit of life that can live independently is a: 1

(a) organ **(b)** tissue **(c)** cell **(d)** molecule

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why are viruses not considered cells? 2

12. Differentiate between unicellular and multicellular organisms with one example each. 2

13. State the function of the cell membrane. 2

14. Give two uses of yeast. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Differentiate between a tissue and an organ with one example each. 3

16. Why are the cells of the human body of different shapes and sizes? Give three examples. 3

17. List three precautions while using a compound microscope. 3

OR

Why are amoeba and paramecium called unicellular? How do they carry out life processes? 3

18. State three reasons why microorganisms are useful. 3

OR

What is meant by magnification? If the eyepiece is 10x and the objective is 40x, what is the total magnification? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe an activity to observe human cheek cells. Name the stain and the features seen. 5

OR

Why is the cell called the basic unit of life? Give three points. 5

20. Describe the characteristics, examples and uses/harms of bacteria. 5

OR

Explain the harmful and beneficial roles of microorganisms with two examples each. 5

END OF QUESTION PAPER — Total: 40 Marks
