THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE · NCERT-TYPE UNIT TEST SET 3

Chapters 1–4: **Exploring the Investigative World of Science, Invisible Living World: Beyond Our Naked Eye, Health: The Ultimate Treasure, Electricity: Magnetic and Heating Effects** | RBSE Pattern | Session 2026–27

Time: 2 Hours Name: _____ Roll No.: _____ **Maximum Marks: 50**

General Instructions:

1. All questions are compulsory.
2. Q. 1–15 are Objective Type (1 mark each).
3. Q. 16–20 are Very Short Answer Type (2 marks each).
4. Q. 21–25 are Short Answer Type (3 marks each).
5. Q. 26–27 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 24–25 and Q. 26–27.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 15 × 1 = 15

Choose the correct option and write it in your answer book.

1. Which of the following is a chronic disease? 1

(a) sneezing **(b)** tuberculosis **(c)** cough for a day **(d)** common cold

2. The filament of an electric bulb is made of: 1

(a) aluminium **(b)** tungsten **(c)** copper **(d)** lead

3. Which of the following shows a scientific attitude? 1

(a) refusing to test ideas **(b)** believing without evidence
(c) curiosity and willingness to question **(d)** following rumours

4. Which instrument was used by Anton van Leeuwenhoek to see 'little animals' in pond water? 1

(a) a telescope **(b)** a magnifying mirror
(c) a simple microscope with a single lens **(d)** an electron microscope

5. A deficiency of iron causes: 1

(a) rickets **(b)** scurvy **(c)** goitre **(d)** anaemia

6. Which wire will heat up more for the same current? 1

(a) a thick silver wire **(b)** a thick copper wire
(c) a thin nichrome wire **(d)** a thick aluminium wire

7. A tentative explanation that can be tested by an experiment is called a: 1

(a) measurement **(b)** hypothesis **(c)** theory only **(d)** law

8. Which part of a cell regulates the entry and exit of substances? 1

(a) cell membrane **(b)** nucleus **(c)** cell wall **(d)** chloroplast

9. Which of the following is a non-communicable disease? 1

(a) measles **(b)** cholera **(c)** malaria **(d)** diabetes

10. Which of these is a good conductor of electricity? 1

(a) copper **(b)** dry wood **(c)** rubber **(d)** plastic

11. A table of observations helps us to: 1

(a) avoid thinking **(b)** organise data and see patterns
(c) change results **(d)** skip measurements

12. An organism made of many cells is called: 1

(a) multicellular **(b)** acellular **(c)** single-celled **(d)** unicellular

13. Pathogens are: 1

(a) antibodies **(b)** disease-causing microorganisms
(c) useful bacteria **(d)** vitamins

14. An electric bell uses the: 1

(a) magnetic effect of current **(b)** light effect only
(c) chemical effect only **(d)** heating effect only

15. While heating a liquid in a test tube, the mouth of the tube should point: 1

(a) away from you and others **(b)** towards the ceiling lamp
(c) towards a friend **(d)** towards your face

SECTION — B (Very Short Answer Type) 5 × 2 = 10

Answer in about 20–30 words each.

16. What are acute and chronic diseases? 2

17. Why do we use nichrome for heating elements? 2

18. What is a variable? Name the two kinds of variables used in an investigation. 2

19. What is a tissue? Give one example from plants or animals. 2

20. Differentiate between a symptom and a sign with one example each. 2

SECTION — C (Short Answer Type) 5 × 3 = 15

Answer in about 40–60 words each.

21. List three ways in which communicable diseases spread, giving an example for each. 3

22. Explain why a bulb does not glow when the switch is open. 3

23. Give three qualities of a good investigator. 3

24. Explain the importance of yeast, bacteria and fungi in our daily life (one use each). 3

OR

State three personal hygiene habits that prevent disease. 3

25. State three safety precautions while using electricity. 3

OR

Why is it important to take measurements using standard units and instruments? 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

26. Explain the steps of the scientific method using the puri-puffing investigation. Why is it called a cycle? 5

OR

Describe the levels of organisation in a multicellular organism using the human body as an example. 5

27. Describe the causes and prevention of the following: malaria, dengue, cholera. 5

OR

Describe how to make an electromagnet and test its strength. Mention factors that affect it. 5

END OF QUESTION PAPER **Total: 50 Marks**
