CLASS 8 — SOCIAL SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 3

Chapter 13: **Dynamics of Population** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which Stage has high birth rate and falling death rate? 1

(a) Stage 1 **(b)** Stage 3 **(c)** Stage 2 **(d)** Stage 4

2. Why does a falling fertility rate not immediately reduce population? 1

(a) many young people are still entering parenthood
(b) migration stops
(c) births stop
(d) deaths are zero

3. An ageing population needs more 1

(a) maternity wards **(b)** toy factories
(c) health care and pensions **(d)** primary schools

4. Which of these is a result of Stage 3? 1

(a) slowing growth as births fall **(b)** population explosion
(c) no growth **(d)** collapse

5. Which relation is correct for states in India? 1

(a) fertility is always highest in states with the highest literacy
(b) higher female literacy goes with higher fertility
(c) lower female literacy goes with lower fertility
(d) higher female literacy goes with lower fertility

6. A youthful population needs more 1

(a) schools and jobs **(b)** old-age homes **(c)** pensions **(d)** nursing

7. The fertility rate of a state is 1.6; this means 1

(a) very high **(b)** equals 2.1
(c) below replacement level **(d)** above replacement

8. A wide pyramid base points to 1

(a) a high birth rate **(b)** a low birth rate
(c) no migrants **(d)** an ageing population

9. Urbanisation affects fertility because 1

(a) cities need farmers
(b) cities have more land
(c) city life, schooling and costs favour smaller families
(d) cities ban children

10. For the same area, if population doubles then density 1

(a) doubles **(b)** stays the same **(c)** becomes zero **(d)** halves

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What is the demographic dividend? 2

12. Why did the death rate fall? 2

13. How does migration change density? 2

14. What does a median age of 28 mean? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how population pyramids differ for young and ageing countries. 3

16. Compare Stage 1 and Stage 3 of demographic transition. 3

17. Describe the changes in India's median age and what they mean. 3

OR

Describe how migration changes the population structure of a village. 3

18. Explain why India's population will keep rising for some years though fertility has fallen. 3

OR

Explain why a rise in life expectancy changes a pyramid. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Analyse the causes and effects of migration to Indian cities. 5

OR

Solve and explain: a state has area 2,500 sq km and population 7,50,000; birth rate 22, death rate 8 per 1,000. Find density and yearly natural increase. 5

20. Evaluate the demographic dividend and what India must do to use it. 5

OR

Explain how the structure of population affects economy and services. 5
