THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 1

Chapter 12: **Reproduction: How Life Continues** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A farmer wants to grow a seedless banana plant. The method he uses is: 1

(a) cross-pollination **(b)** grafting only
(c) seed sowing **(d)** vegetative propagation by suckers

2. A flower has stamens and a carpel. It is a: 1

(a) bisexual flower **(b)** unisexual flower **(c)** female flower **(d)** male flower

3. The number of chromosomes in a human zygote is: 1

(a) 92 **(b)** 23 **(c)** 44 **(d)** 46

4. An egg is fertilised on the 14th day of the menstrual cycle. The next menstruation will be: 1

(a) on the 28th day **(b)** on the 21st day **(c)** on the 15th day **(d)** absent

5. A gardener wants a rose plant with flowers of two colours. The method is: 1

(a) seed sowing **(b)** binary fission **(c)** spore formation **(d)** grafting

6. Papaya and cucumber flowers are: 1

(a) bisexual **(b)** asexual **(c)** sterile **(d)** unisexual

7. A cell of the human body has 46 chromosomes. After mitosis each daughter cell has: 1

(a) 44 **(b)** 92 **(c)** 46 **(d)** 23

8. The ovulation takes place on about: 1

(a) the 1st day **(b)** the 14th day of a 28-day cycle
(c) the 7th day **(d)** the 28th day

9. A student sees tiny buds on the margin of a Bryophyllum leaf. They are used for: 1

(a) photosynthesis **(b)** storage
(c) respiration **(d)** vegetative reproduction

10. In the case of a unisexual flower, the pollination is always: 1

(a) cross-pollination (or between flowers) **(b)** by water only
(c) self within the flower **(d)** absent

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why do plants that are propagated vegetatively not show variation? 2

12. Why is a bud formed in Hydra considered a form of asexual reproduction? 2

13. Why do the seeds need dormancy? Give one reason. 2

14. Why do flowers have nectar and bright colours? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Differentiate between the structure and functions of a sperm and an ovum. 3

16. Compare the reproduction in hen and the reproduction in humans. 3

17. Explain the importance of vaccination and a healthy diet in pregnancy. 3

OR

Explain how fertilisation takes place in a flowering plant after pollination. 3

18. Explain why identical twins are always of the same sex and fraternal twins may be different. 3

OR

Name three organisms that reproduce by fragmentation or regeneration with the part regenerated. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the sequence of events from the production of gametes to the birth of a baby in humans, with the organs involved. 5

OR

Explain the structure of seeds (bean and maize), the parts, and the process of germination. 5

20. Compare the vegetative propagation and tissue culture, including the methods, advantages, and examples. 5

OR

Describe how reproduction in the amoeba, yeast, Hydra, Plasmodium and bread mould differ with the unit of reproduction. 5

END OF QUESTION PAPER — Total: 40 Marks
