THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SOCIAL SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 1

Chapter 3: **Shaping the Earth's Surface (Geography)** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A depression where limestone ground collapses is 1

(a) a sinkhole **(b)** a delta **(c)** a cirque **(d)** a fjord

2. Which feature of a river shows that it has been cut off from the main stream? 1

(a) Waterfall **(b)** V-shaped valley **(c)** Oxbow lake **(d)** Gorge

3. How does oceanic crust differ from continental crust? 1

(a) It is entirely liquid **(b)** It is thinner, about 5-7 km

(c) It is thicker, about 30-40 km **(d)** It is made only of loose sediment

4. A smaller glacial valley ending high above a main valley is a 1

(a) hanging valley **(b)** cirque **(c)** stack **(d)** fjord

5. A sudden rise in temperature on a snowy mountain slope may trigger 1

(a) a tsunami **(b)** a sinkhole **(c)** a dust storm **(d)** an avalanche

6. Why do rivers form V-shaped valleys in the upper course? 1

(a) Strong vertical erosion on a steep slope **(b)** Slow flow

(c) Heavy deposition **(d)** Wind erosion

7. Why do meanders develop in the plains? 1

(a) River flows very steeply

(b) River erodes outer bank and deposits on inner bank

(c) Glaciers push

(d) Wind blows

8. Mitigation for landslides includes 1

(a) cutting more trees **(b)** afforestation and better drainage

(c) more mining **(d)** building on steep slopes

9. A tourist notes rock peeling in a hot desert after day-night temperature swings. This is 1

(a) chemical weathering **(b)** physical weathering

(c) deposition **(d)** biological weathering

10. A rock polished by wind-blown sand is a 1

(a) ventifact **(b)** arch **(c)** fjord **(d)** stalagmite

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How does erosion differ from weathering in terms of movement? 2

12. How do dunes protect coastal settlements? 2

13. Why is physical weathering common in deserts? 2

14. How does a glacier shape a V-shaped river valley into U-shaped? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how human activities increase risk of disasters in hill areas. 3

16. Explain how plates are linked to continents and oceans distribution. 3

17. Why are glaciers called the water towers? 3

OR

Compare convergent and divergent boundaries in three points. 3

18. Explain why most volcanoes are found around the Pacific. 3

OR

Explain the importance of beaches and coastal landforms for people. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain how a river's work changes from source to mouth with landforms. 5

OR

Explain how weathering types operate in different climates. 5

20. Explain how plate boundaries are linked to the distribution of earthquakes, volcanoes and mountains. 5

OR

Describe how glaciers create and destroy landforms. 5

END OF QUESTION PAPER — Total: 40 Marks
