THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 3

Chapter 6: **Control and Coordination** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Reflex arc includes: 1

(a) only glands
(b) only muscles
(c) brain only
(d) receptor, sensory neuron, spinal cord, motor neuron, effector

2. The part of the brain that maintains posture and balance is: 1

(a) pons **(b)** medulla **(c)** cerebellum **(d)** cerebrum

3. Which hormone helps in the elongation of stem? 1

(a) cytokinin **(b)** abscisic acid **(c)** gibberellin **(d)** adrenaline

4. The thinking part of the brain is the: 1

(a) medulla **(b)** pons **(c)** cerebrum **(d)** cerebellum

5. Which of the following is a reflex action? 1

(a) walking **(b)** writing
(c) talking **(d)** withdrawal of hand from a hot object

6. Plant growth hormones are made in the: 1

(a) leaves only **(b)** flowers only
(c) fruits only **(d)** tips of shoots and roots

7. The correct path of a nerve impulse in the neuron is: 1

(a) dendrite -> cell body -> axon -> nerve ending
(b) axon -> dendrite -> cell body
(c) nerve ending -> axon -> dendrite
(d) cell body -> dendrite -> axon

8. The involuntary actions like blood pressure and salivation are controlled by the: 1

(a) cerebrum **(b)** medulla in the hindbrain
(c) forebrain **(d)** cerebellum

9. Which of the following shows negative phototropism? 1

(a) shoot **(b)** leaf **(c)** roots **(d)** tendril

10. Testosterone is secreted by: 1

(a) thyroid **(b)** pancreas **(c)** ovary **(d)** testes

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why are some patients of diabetes treated by giving injections of insulin? 2

12. How do we detect the smell of an agarbatti? 2

13. How do chemical signals reach target tissues in plants? 2

14. What is the function of receptors in our body? Name two receptors. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain the tropic movements with examples: phototropism, geotropism, hydrotropism. 3

16. Why do we call the pituitary the master gland? 3

17. Explain why adrenaline is called the emergency hormone. 3

OR

Name three plant hormones with their functions. 3

18. What are the effects of the deficiency of iodine and growth hormone? 3

OR

What is the role of cytokinins in plants? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the plant hormones: auxin, gibberellin, cytokinin, abscisic acid with functions. 5

OR

Explain how a plant responds to touch, light and water with the mechanism in each case. 5

20. Describe the endocrine glands: pituitary, thyroid, pancreas, adrenal and the hormones, with one disorder each. 5

OR

Describe the movement of impulse from a hot object touched by a hand to the muscle and the brain. 5

END OF QUESTION PAPER — Total: 40 Marks
