THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE · EASY LEVEL UNIT TEST SET 2

Chapters 5–8: **Life Processes, Control and Coordination, How do Organisms Reproduce?, Heredity** | RBSE Pattern | Session 2026–27

Time: 2 Hours Name: _____ Roll No.: _____ **Maximum Marks: 50**

General Instructions:

1. All questions are compulsory.
2. Q. 1–15 are Objective Type (1 mark each).
3. Q. 16–20 are Very Short Answer Type (2 marks each).
4. Q. 21–25 are Short Answer Type (3 marks each).
5. Q. 26–27 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 24–25 and Q. 26–27.
7. Write the question number before each answer.
8. Easy level: direct, single-step questions.

SECTION — A (Objective Type Questions) 15 × 1 = 15

Choose the correct option and write it in your answer book.

1. Mendel worked on 1

(a) maize **(b)** wheat **(c)** garden pea **(d)** mango

2. The largest gland in the human body is: 1

(a) salivary gland **(b)** thyroid **(c)** liver **(d)** pancreas

3. Thyroxine is secreted by the: 1

(a) adrenal **(b)** pituitary **(c)** pancreas **(d)** thyroid

4. The sticky top of the pistil is the 1

(a) stigma **(b)** anther **(c)** filament **(d)** style

5. Sex chromosomes in a human male are 1

(a) XO **(b)** XY **(c)** YY **(d)** XX

6. Blood leaves the heart through the: 1

(a) lymph vessels **(b)** veins **(c)** arteries **(d)** capillaries

7. Roots grow towards: 1

(a) light only **(b)** water and gravity

(c) air **(d)** touch

8. The female gamete is the 1

(a) sperm **(b)** uterus **(c)** placenta **(d)** ovum

9. Which is an acquired trait? 1

(a) Height potential **(b)** A scar from an accident

(c) Hair colour **(d)** Blood group

10. The green pigment in leaves is: 1

(a) haemoglobin **(b)** carotene **(c)** melanin **(d)** chlorophyll

11. Signals from the sense organs travel to the brain through: 1

(a) sensory neurons **(b)** motor neurons **(c)** hormones **(d)** blood

12. Yeast reproduces by 1

(a) fertilisation **(b)** budding **(c)** pollination **(d)** regeneration

13. A character such as tallness or dwarfness is called a 1

(a) cell **(b)** gene **(c)** gamete **(d)** trait

14. Digestion is completed in the: 1

(a) large intestine **(b)** small intestine **(c)** mouth **(d)** stomach

15. Adrenaline is secreted by the: 1

(a) thyroid **(b)** adrenal glands **(c)** liver **(d)** kidney

SECTION — B (Very Short Answer Type) — 5 × 2 = 10

Answer in about 20–30 words each.

16. Name the three main parts of the brain. 2

17. What are spores? 2

18. What are chromosomes? 2

19. What is transpiration? 2

20. What is tropism? Name two types. 2

SECTION — C (Short Answer Type) — 5 × 3 = 15

Answer in about 40–60 words each.

21. How many types of gametes are produced by TT, Tt and tt? 3

22. How do plants excrete waste? Give three ways. 3

23. What is the role of adrenaline? 3

24. What are the advantages of vegetative propagation? 3

OR

What do you understand by the term 'independent assortment'? 3

25. Name three types of heterotrophic nutrition with an example each. 3

OR

Name the parts of a reflex arc in order. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

26. Describe transport in plants: xylem and phloem differences (five points). 5

OR

What are the disorders caused by the lack of hormones? Describe four. 5

27. Explain fertilisation in flowering plants. 5

OR

Explain the terms: allele, homozygous, heterozygous, F1, F2. 5

END OF QUESTION PAPER — Total: 50 Marks
