ANSWER KEY & MARKING SCHEME SET 1

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
2	**(d)** Durgapur - Gujarat	Durgapur is in West Bengal
3	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
4	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
5	**(a)** information technology	Software services
6	**(c)** coking coal	Used in blast furnaces
7	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
8	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
9	**(c)** cheaper synthetic substitutes	Plastic bags and synthetics
10	**(d)** 25 per cent by 2022	To raise growth

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Water is scarce (1); Recycling cuts costs and pollution (1).	1+1
12	Solid waste and chemicals contaminate soil (1); Fertility falls and land becomes unfit (1).	1+1
13	Liberalisation opened markets (1); It raised competition and investment (1).	1+1
14	Treatment plants and filters are costly (1); Firms need to invest, but society gains (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	The Bhopal tragedy showed safety lapses (1); Rules and training are needed (1); Accidents cost lives (1).	1+1+1
16	Synthetic competition (1); Old machines (1); Falling demand (1).	1+1+1
17	Ports allow import of raw materials (1); They enable exports (1); They attract industries (1).	1+1+1
	OR: Cooperatives pool farmers' resources (1); They assure markets and incomes (1); They develop rural areas (1).	1+1+1
18	Odisha and Jharkhand have bauxite (1); They have cheap power from coal (1); Smelters use both (1).	1+1+1
	OR: Industry creates growth and jobs (1); It also pollutes (1); Balance needs controls (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Cotton textiles are concentrated in Maharashtra and Gujarat, near cotton fields, markets and ports, with the first successful mill set up in Mumbai in 1854 (1); Spinning is mechanised, but weaving is largely in the decentralised sector of handloom and powerloom (1); Jute mills are mostly in the Hugli basin of West Bengal, the first one coming up at Rishra in 1855 (1); Cotton mills suffer from irregular power supply, old machinery, low labour productivity and competition from synthetic fibres (1); Jute faces competition from synthetic substitutes, lower demand and old machinery, so modernisation is needed (1).	1+1+1+1+1
	OR: Liberalisation after 1991 opened the economy to foreign investment and competition (1); It improved technology, quality and productivity in industries such as automobiles and electronics (1); Consumers got more choice (1); Some old industries and small units struggled against imports (1); Overall, industry became more efficient, but pollution and job insecurity need attention (1).	1+1+1+1+1

20	IT and electronics include software, computers and telecom equipment, and Bengaluru is the electronic capital of India (1); Software Technology Parks provide infrastructure to boost exports and create jobs for educated youth (1); These industries cause little pollution (1); Chemical industries produce fertilisers, pesticides, paints, soaps and drugs and are located in Gujarat, Tamil Nadu, Maharashtra and elsewhere (1); Chemicals support agriculture and industry but also cause pollution (1).	1+1+1+1+1
	OR: Industries are classified by raw material (agro-based and mineral-based), role (basic and consumer), capital (small and large scale), ownership (public, private, joint, cooperative) and bulk of raw material and product (heavy and light) (1); Location depends on availability of raw material, power, labour, capital, transport, markets and government policy (1); Weight-losing raw materials pull industries towards sources: iron and steel near iron ore and coal, sugar near cane fields (1); Cotton textiles grew near cotton and ports in Mumbai and Gujarat, and aluminium near cheap power (1); Industries also cluster near cities and ports for banking, transport and markets, called agglomeration economies (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** cooperative industry	Farmers own it
2	**(d)** old technology	Low labour productivity too
3	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
4	**(c)** Visakhapatnam	Located on the coast
5	**(c)** chemicals	Effluents and gases
6	**(c)** liberalisation	Opened economy
7	**(a)** cluster there	Location advantage
8	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
9	**(d)** industrial effluents	Chemicals and dyes
10	**(b)** TISCO - Jamshedpur	Jamshedpur is in Jharkhand

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Cars need steel, rubber and glass (1); Growth in autos raises demand for them (1).	1+1
12	Goods like cars need nearness to consumers (1); Market location cuts delivery cost (1).	1+1
13	They attract investment and exports (1); They offer infrastructure and incentives (1).	1+1
14	Farmers own the mills (1); Local control and shared profit raise efficiency (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Sugar mills moved to south and west (1); Cane there has higher sugar content (1); Cooler climate gives a longer crushing season and cooperatives are strong (1).	1+1+1
16	Industries create jobs (1); They raise incomes (1); They reduce poverty (1).	1+1+1
17	Technology raises output (1); It cuts waste (1); It improves quality (1).	1+1+1
	OR: Some regions have more industry (1); Others lack infrastructure (1); Policy should spread growth (1).	1+1+1
18	Cement is used for roads and dams (1); It supports housing (1); Infrastructure growth depends on it (1).	1+1+1
	OR: IT parks provide infrastructure (1); Exports earned foreign exchange (1); They created jobs (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Iron and steel is a basic industry because machines, tools, vehicles and construction depend on steel (1); Raw materials are iron ore, coking coal, limestone and manganese, which are bulky, so plants are near them (1); Plants at Bhilai, Durgapur, Rourkela, Bokaro and Jamshedpur are inland, and Visakhapatnam is port-based (1); TISCO in the private sector is at Jamshedpur, and SAIL markets steel for public plants (1); Problems include high costs and limited coking coal, low labour productivity and irregular power supply (1).	1+1+1+1+1
	OR: Public sector industries are owned and operated by government agencies, such as BHEL, SAIL and Indian Railways (1); Private sector industries are owned by individuals or companies, such as TISCO and Dabur (1); Joint sector industries are run by the state and private individuals, such as Oil India Ltd (1); Cooperative sector industries are owned by producers or suppliers of raw material, such as sugar mills in Maharashtra (1); Each has different aims: public welfare, profit, mixed benefit or members' benefit (1).	1+1+1+1+1

20	Manufacturing creates jobs, adds to GDP and earns foreign exchange through exports of finished goods (1); It modernises agriculture by supplying fertilisers and machines (1); It reduces regional disparities by locating industries in backward areas (1); Its share in GDP is about 17 per cent, and the National Manufacturing Competitiveness Council was set up in 2006 to raise it to 25 per cent (1); Challenges are power shortages, old technology, low productivity, poor infrastructure and pollution (1).	1+1+1+1+1
	OR: Industries are concentrated in a few regions near cities, ports and raw materials, such as Mumbai-Pune and the Hugli belt (1); Backward areas lack infrastructure, power and skilled labour, and attract few industries (1); Mineral-rich states supply raw materials but have little processing industry (1); Government incentives have not fully balanced growth (1); Better infrastructure and policy support are needed to spread industry (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 11: **Manufacturing Industries (Geography)** | Class 10 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** A is false but R is true.	A false; R true
2	**(b)** infrastructure, labour and markets	Agglomeration economies
3	**(c)** Mumbai in 1854	The Bombay Spinning and Weaving Company
4	**(a)** aluminium smelting	Needs a lot of electricity
5	**(a)** creates demand for steel, glass and rubber	Linked industries
6	**(c)** treating hot water in cooling ponds before release	Cools water first
7	**(a)** lack of safety measures	Poor safety
8	**(d)** A is false but R is true.	A false; R true
9	**(a)** Both A and R are true and R is the correct explanation of A.	Both true; R explains A
10	**(d)** joint sector	Mixed ownership

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They employ many people (1); They supply local needs with low capital (1).	1+1
12	Gas is a raw material and fuel for ammonia (1); Fertiliser plants are near gas sources (1).	1+1
13	Old technology and overstaffing raise costs (1); Management and funds problems reduce output (1).	1+1
14	Bulky raw materials are costly to transport (1); Locating near them cuts cost (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Rules limit pollution (1); They raise costs for industry (1); They protect health and environment (1).	1+1+1
16	Mills produce yarn and cloth in bulk (1); Handlooms make special cloth (1); Decentralised weaving gives jobs (1).	1+1+1
17	Fertilisers raise yield (1); They support food security (1); Overuse harms soil (1).	1+1+1
	OR: Autos create jobs (1); They add to air pollution (1); CNG and cleaner fuel reduce it (1).	1+1+1
18	Public sector plants provide basic steel (1); Private sector like TISCO is efficient (1); Both are needed but costs are high (1).	1+1+1
	OR: Cleaner technology cuts pollution (1); It saves resources (1); It avoids disasters (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	The Bhopal gas tragedy occurred on the night of 2-3 December 1984 when methyl isocyanate leaked from the Union Carbide pesticide plant (1); Thousands of people died and many suffered permanent disabilities (1); The cause was lack of safety measures and poor maintenance (1); It showed the danger of hazardous industries near habitation (1); Lessons include strict safety rules, regular inspection, emergency plans and accountability of companies (1).	1+1+1+1+1
	OR: Industries cause air pollution by smoke and toxic gases, water pollution by untreated effluents, thermal pollution by hot water, and noise pollution by machines (1); These harm health, kill aquatic life and damage soil (1); The Bhopal gas tragedy of 1984 showed the scale of harm (1); Control measures include treating effluents before release, recycling water, installing electrostatic precipitators and scrubbers, and silencers on generators (1); Planting trees around factories and strict enforcement of laws also help (1).	1+1+1+1+1
20	Agro-based industries use farm raw materials, as in cotton, jute, silk, woollen textiles, sugar and edible oil (1); Mineral-based industries use ores, as in iron and steel, cement, aluminium and petrochemicals (1); Agro-based industries depend on the farm output and are seasonal, like sugar (1); Mineral-based industries depend on mines and are mostly heavy industries (1); Both need power, transport and markets (1).	1+1+1+1+1

	OR: Traditional industries like cotton and jute have declined in relative importance due to old technology and competition (1); Modern industries like IT, electronics and automobiles have grown with new technology and skilled labour (1); Services and manufacturing have become more linked, as IT supports industry (1); Production needs fewer workers per unit and more skills (1); Policy has encouraged modernisation and exports (1).	1+1+1+1+1

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
