CLASS 6 — SCIENCE CHAPTER TEST SET A

Chapter 4: **Exploring Magnets** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Materials that are attracted by a magnet are called: 1

(a) insulators **(b)** liquids
(c) non-magnetic materials **(d)** magnetic materials

2. A freely suspended bar magnet always rests in the: 1

(a) north–south direction **(b)** any direction
(c) up–down direction **(d)** east–west direction

3. The instrument used to find directions with a magnetic needle is a: 1

(a) compass **(b)** telescope **(c)** barometer **(d)** thermometer

4. Magnets are used in: 1

(a) only thermometers **(b)** only fans
(c) refrigerator doors and compasses **(d)** none of these

5. A magnet can attract an iron nail through: 1

(a) any thick iron block **(b)** a sheet of paper
(c) nothing **(d)** none

6. The pole of a freely suspended magnet pointing to the south is the: 1

(a) south pole **(b)** north pole **(c)** poles are same **(d)** equator

7. Copper coin is: 1

(a) magnetic **(b)** non-magnetic
(c) a conductor of magnetism **(d)** a magnet

8. To keep bar magnets strong we place: 1

(a) plastic keepers **(b)** nothing
(c) wood across them **(d)** soft iron keepers across their poles

9. A magnet floating on a cork in water settles: 1

(a) vertically **(b)** east–west **(c)** north–south **(d)** randomly

10. Fridge magnets stick because: 1

(a) magnets are heavy
(b) fridge is cold
(c) the fridge door is made of a magnetic metal
(d) magnet is glued

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 10–15 words each.

11. What are magnetic and non-magnetic materials? Give two examples each. 2

12. What are the poles of a magnet? 2

13. State the law of magnetic poles. 2

14. How can you make a simple compass? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. How can you identify the poles of an unmarked bar magnet using another magnet? 3

16. Describe an activity to classify materials into magnetic and non-magnetic. 3

17. Explain with a diagram how a magnetic compass is used. 3

OR

What are the properties of magnets? 3

18. Why can a magnet attract an iron nail through paper? 3

OR

Explain how a magnet can be stored safely. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. (i) Define magnetic materials.
(ii) Describe an activity to separate magnetic and non-magnetic objects.
(iii) Prepare a table of results. 5

OR

(i) What are poles of a magnet?
(ii) State the law of magnetic poles.
(iii) Explain with a sketch of two bar magnets. 5

20. **Case study:** A student suspends a bar magnet with a thread. It turns and stops pointing in one direction.
(i) Which direction?
(ii) Why?
(iii) What are the ends called?
(iv) How will she use this to find directions? 5

OR

(i) How is a magnetic compass made?
(ii) How is it used?
(iii) What precautions are necessary? 5

END OF QUESTION PAPER — Total: 40 Marks

MASTERMIND
