# THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

## CLASS 6 — SCIENCE CHAPTER TEST SET A

Chapter 5: **Measurement of Length and Motion** | RBSE Pattern | Session 2026–27

**Time: 1 Hour 30 Minutes** Name: _____ Roll No.: _____ **Maximum Marks: 40**

**General Instructions:**

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

## SECTION — A (Objective Type Questions) 10 × 1 = 10

*Choose the correct option and write it in your answer book.*

**1.** The SI unit of length is: 1

**(a)** litre **(b)** kilometre **(c)** metre **(d)** centimetre

**2.** The common instrument to measure the length of a pencil is: 1

**(a)** stopwatch **(b)** thermometer **(c)** balance **(d)** a ruler (scale)

**3.** To measure with a ruler, the object should be placed with its end at: 1

**(a)** the end of the thread
**(b)** any random position
**(c)** the edge of the scale's case
**(d)** the zero mark (or a clear mark) of the scale

**4.** Old methods of measuring used: 1

**(a)** only GPS **(b)** only lasers
**(c)** handspans, foot-lengths and cubits **(d)** none

**5.** A car moving along a straight road shows: 1

**(a)** circular motion **(b)** rotation **(c)** random motion **(d)** linear motion

**6.** The motion of a butterfly flying is: 1

**(a)** periodic **(b)** circular only **(c)** random **(d)** linear only

**7.** The motion of a ball dropped from a height is: 1

**(a)** linear **(b)** oscillatory **(c)** circular **(d)** random only

**8.** A boy standing at a bus stop is: 1

**(a)** at rest with respect to the bus stop **(b)** in motion always
**(c)** in rotation **(d)** flying

**9.** The distance 2.5 km in metres is: 1

**(a)** 250 m **(b)** 2500 m **(c)** 25 m **(d)** 25,000 m

**10.** The length of an irregular object can be measured with the help of: 1

**(a)** a thermometer **(b)** a stopwatch
**(c)** a thread and scale **(d)** a balance

## SECTION — B (Very Short Answer Type) 4 × 2 = 8

*Answer in about 10–15 words each.*

**11.** Why do we need standard units of measurement? 2

**12.** Write the SI unit of length and one multiple. 2

**13.** Convert 3.5 m into cm. 2

**14.** Convert 4,500 m into km. 2

## SECTION — C (Short Answer Type) — 4 × 3 = 12

*Answer in about 30–40 words each.*

**15.** Describe how to measure the length of a book correctly using a ruler. 3

**16.** How would you measure the length of a road map's curved path from A to B? 3

**17.** Distinguish between rotational and oscillatory motion with examples. 3

**OR**

Explain linear, circular and periodic motion with examples. 3

**18.** Convert 2 km 350 m into metres and into centimetres. 3

**OR**

Write three precautions to be followed while measuring length. 3

## SECTION — D (Long Answer Type) — 2 × 5 = 10

*Answer in about 80–100 words each.*

**19.** (i) Why do we need standard units? 5
(ii) State the SI units and conversions of length.
(iii) Convert 5.6 km into m and cm.

**OR**

(i) Describe the correct method of measuring the length of a straight object using a ruler. 5
(ii) List three common errors.
(iii) How can they be avoided?

**20.** **Case study:** Meena measures the length of her desk with her handspan and gets 7 spans. 5
Her friend gets 6 spans.
(i) Why do they differ?
(ii) Which unit is non-standard?
(iii) How can they agree?
(iv) State the better method.

**OR**

(i) Explain how to measure a curved path using a thread. 5
(ii) Measure a river on a map showing a thread of 18.5 cm if 1 cm = 2 km.
(iii) Give another example.

## END OF QUESTION PAPER — Total: 40 Marks

MASTERMIND
