THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE CHAPTER TEST SET A

Chapter 7: **Temperature and its Measurement** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The degree of hotness or coldness of an object is its: 1

(a) volume **(b)** mass **(c)** temperature **(d)** heat

2. The boiling point of water at sea level is: 1

(a) 50 °C **(b)** 0 °C **(c)** 37 °C **(d)** 100 °C

3. The liquid commonly used in a thermometer is: 1

(a) mercury or coloured alcohol **(b)** milk

(c) water **(d)** oil only

4. A thermometer works because the liquid in it: 1

(a) shrinks when heated **(b)** evaporates

(c) expands when heated **(d)** freezes

5. The reading should be taken with: 1

(a) after removing **(b)** eyes at an angle

(c) eyes closed **(d)** eyes in line with the liquid level

6. Heat is a form of: 1

(a) matter **(b)** force **(c)** energy **(d)** mass

7. The kink in a clinical thermometer is there to: 1

(a) stop the mercury from falling back immediately

(b) add weight

(c) make it look good

(d) increase range

8. The temperature of a cup of hot tea after some time: 1

(a) stays same **(b)** doubles **(c)** increases **(d)** decreases

9. Hot water has more thermal energy than the same amount of cold water because: 1

(a) it is blue **(b)** it is lighter

(c) it is transparent **(d)** its particles move faster

10. A metal spoon in hot tea feels hot soon because: 1

(a) metal is shiny **(b)** spoon is cold

(c) tea is sweet **(d)** heat flows through the metal

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 10–15 words each.

11. What is temperature? How is it measured? 2

12. Name the two common types of thermometers. 2

13. What is the normal body temperature? 2

14. State the boiling and freezing points of water. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Describe the activity to show that our sense of touch can mislead us. 3

16. Write the steps to measure the body temperature with a clinical thermometer. 3

17. Distinguish between a clinical thermometer and a laboratory thermometer. 3

OR

State three precautions while using a laboratory thermometer. 3

18. What are the differences between temperature and heat? 3

OR

Explain how a thermometer works. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. (i) Define temperature. 5
(ii) Describe the construction of a clinical thermometer.
(iii) How do you use it?

OR

(i) What is the difference between hotness and temperature? 5
(ii) Why is touch unreliable?
(iii) Describe the activity.

20. **Case study:** A child feels warm. The thermometer reads 38.6 °C. 5
(i) Is it normal?
(ii) What instrument?
(iii) How should it be used?
(iv) What should the parent do?

OR

(i) What are conductors and insulators of heat? 5
(ii) Give examples.
(iii) Describe an activity to compare conductors.

END OF QUESTION PAPER — Total: 40 Marks
