THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE CHAPTER TEST SET B

Chapter 8: **A Journey through States of Water** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The change of water vapour into liquid water is: 1

(a) melting **(b)** evaporation **(c)** freezing **(d)** condensation

2. The three states of water are: 1

(a) only liquid **(b)** ice, steam, snow only
(c) ice, liquid water and water vapour **(d)** mist, fog, rain

3. Evaporation is faster when the surface area is: 1

(a) zero **(b)** larger **(c)** smaller **(d)** constant only

4. Why do we feel cool when we sweat and a breeze blows? 1

(a) it is a magic
(b) Evaporation of sweat takes heat from the body
(c) air is always cold
(d) sweat is cold

5. The continuous movement of water between Earth and the atmosphere is the: 1

(a) water cycle **(b)** carbon cycle **(c)** rock cycle **(d)** food chain

6. A pot cooler (matka) keeps water cool because of: 1

(a) magic **(b)** the colour of clay
(c) the shape **(d)** evaporation from the pores

7. When water freezes it: 1

(a) becomes gas **(b)** expands slightly **(c)** disappears **(d)** contracts a lot

8. Which of these is an example of evaporation? 1

(a) Ice forming **(b)** Wet floor getting dry
(c) Fog **(d)** Dew

9. Hail is: 1

(a) balls of ice falling from clouds **(b)** fog
(c) warm rain **(d)** mist

10. The process by which snow turns into water in spring is: 1

(a) melting **(b)** condensation **(c)** boiling **(d)** evaporation

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 10–15 words each.

11. Why do wet clothes dry faster on a windy day? 2

12. What is melting? State the melting point of ice. 2

13. What is freezing? Give one example. 2

14. Why do we feel cool after sweating? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. State three differences between evaporation and condensation. 3

16. Why does ice float in water? What happens as it melts? 3

17. Why are salt pans used to obtain salt? 3

OR

Why do wet clothes dry slowly in the rainy season? 3

18. How can you speed up the evaporation of water from a plate? 3

OR

State what happens when water is cooled below 0 °C and when ice is heated above 0 °C. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. (i) How are clouds formed? 5
(ii) How does rain occur?
(iii) Mention other forms of precipitation.

OR

Case study: A glass of cold lemonade has droplets on its surface. 5
(i) Where did the water come from?
(ii) Name the process.
(iii) Would it happen with a hot drink?
(iv) What does it show about air?

20. (i) State the cooling effect of evaporation. 5
(ii) Give four examples.
(iii) Explain one in detail.

OR

(i) Differentiate between evaporation and boiling. 5
(ii) Between melting and freezing.
(iii) Give examples.

END OF QUESTION PAPER — Total: 40 Marks
