CLASS 6 — SCIENCE CHAPTER TEST SET A

Chapter 9: **Methods of Separation in Everyday Life** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A material made of two or more substances mixed together is a: 1

(a) pure substance **(b)** solid only **(c)** element **(d)** mixture

2. Winnowing works because: 1

(a) grains are lighter
(b) wind is cold
(c) husk is heavier
(d) light husk is blown away while heavy grains fall

3. Settling of heavier insoluble particles at the bottom of a liquid is: 1

(a) sieving **(b)** condensation **(c)** sedimentation **(d)** evaporation

4. Obtaining butter from curd or cream by rotating is: 1

(a) decantation **(b)** churning **(c)** winnowing **(d)** filtration

5. A mixture of sand and salt can be separated by dissolving in water, filtering and then: 1

(a) winnowing **(b)** decanting only
(c) using a magnet **(d)** evaporating the filtrate

6. Which of these is NOT a mixture? 1

(a) Lemonade **(b)** Distilled water **(c)** Soil **(d)** Air

7. The clear liquid that passes through the filter is the: 1

(a) sediment **(b)** filtrate **(c)** solute **(d)** residue

8. Water can dissolve more solute when it is: 1

(a) cooled **(b)** frozen **(c)** closed **(d)** heated

9. Seawater can give both salt and fresh water by: 1

(a) winnowing **(b)** sieving
(c) handpicking **(d)** evaporation and condensation

10. The best method to get pure water from muddy water for drinking at home: 1

(a) Sieve only **(b)** Stir only
(c) Settle, filter and boil **(d)** Freeze it

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. What is a mixture? Give two examples. 2

12. Why do we separate the components of a mixture? 2

13. What is handpicking? Where is it used? 2

14. What is winnowing? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Explain winnowing with an example. 3

16. Describe how to separate a mixture of sand, salt and iron filings. 3

17. Explain sedimentation and decantation with an example. 3

OR

Describe the steps of filtration using filter paper. 3

18. How can drinking water be made from muddy water? 3

OR

How is a mixture of salt and water separated? Why can't it be filtered? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. (i) Define mixtures.
(ii) List five methods of separation.
(iii) Give an example for each. 5

OR

(i) Explain winnowing, threshing and sieving.
(ii) Where are they used?
(iii) On what principle does each depend? 5

20. **Case study:** A student has a mixture of sand, salt and iron filings. 5
(i) Which method first?
(ii) Next?
(iii) Last?
(iv) Why does the order matter?

OR

(i) Describe how to purify muddy water. 5
(ii) Draw the apparatus.
(iii) Why is boiling needed?

END OF QUESTION PAPER — Total: 40 Marks
