THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE CHAPTER TEST SET B

Chapter 9: **Methods of Separation in Everyday Life** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The process of separating the useful components from a mixture is called: 1

(a) separation **(b)** mixing **(c)** dissolving **(d)** melting

2. Separating flour from bran using a sieve is: 1

(a) filtration **(b)** sieving **(c)** evaporation **(d)** winnowing

3. Pouring out the clear liquid after sedimentation is: 1

(a) evaporation **(b)** filtration **(c)** winnowing **(d)** decantation

4. Iron pieces from a mixture are separated using: 1

(a) a magnet **(b)** filter paper **(c)** sieve **(d)** winnowing

5. Which method is used to separate cream from milk? 1

(a) Handpicking **(b)** Churning/centrifuging
(c) Sieving **(d)** Winnowing

6. The substance which dissolves in a solvent is the: 1

(a) solute **(b)** solvent **(c)** filtrate **(d)** residue

7. The method used to separate cooking oil from water is: 1

(a) decantation (using a separating funnel) **(b)** magnet
(c) handpicking **(d)** winnowing

8. Alum is used to: 1

(a) colour the water **(b)** heat water
(c) make suspended particles in water settle **(d)** flavour water

9. The separation of cream from milk uses the idea that cream is: 1

(a) magnetic **(b)** lighter than milk
(c) coloured **(d)** heavier than milk

10. The machine used for separating cream in dairies is a: 1

(a) thermometer **(b)** balance
(c) centrifuge (cream separator) **(d)** microscope

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. State the principle of sieving. 2

12. What is sedimentation? What is decantation? 2

13. What is filtration? 2

14. How can salt be separated from sea water? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. What is the difference between sieving and filtration? 3

16. Write the methods used in agriculture for separating grain from the harvest. 3

17. Why is churning useful at home and dairies? 3

OR

How can we separate cooking oil from water? 3

18. Distinguish between solution and mixture with examples. 3

OR

Explain how magnets help in recycling. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. (i) What are sedimentation and decantation? 5
(ii) How can they be combined?
(iii) Give a household example.

OR

Case study: A farmer has harvested wheat. 5
(i) How does he separate grain from stalks?
(ii) How does he remove husk?
(iii) How does he remove stones?
(iv) Which method uses wind?

20. (i) What is filtration? 5
(ii) Write the procedure.
(iii) Identify residue and filtrate.

OR

(i) Explain evaporation as a separation method. 5
(ii) How is salt made from sea water?
(iii) Why is sunlight used?

END OF QUESTION PAPER — Total: 40 Marks
