THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 ENGLISH — READING SKILL PAPER SET 10

Reading Comprehension | RBSE Board Pattern | Session 2026–27

Time: 45 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 20**

General Instructions:

1. All questions are compulsory.
2. Section A has one factual passage with 10 questions (1 mark each).
3. Section B has one story or poem with 10 questions (1 mark each).
4. Write the question number before each answer.

SECTION — A (Reading Comprehension: Factual Passage) 10 Marks

Read the passage and answer the questions.

1. *Read the passage carefully and answer the questions that follow.* 10

Power from the Sun

The sun is a giant ball of burning gas that gives us light and heat every day. This energy, called solar energy, is free, clean and will last for millions of years. Unlike coal and petrol, it does not produce smoke or harmful gases when we use it, and therefore it does not pollute the air.

We can capture the sun's energy in several ways. A solar water heater uses the heat of the sun to warm water for bathing. A solar cooker can cook rice and vegetables slowly in the sunshine. Solar panels are made of special cells that turn sunlight into electricity. Many villages in India that were once without power now have lights, fans and water pumps run by solar panels. Even streetlights and traffic signals in some cities use solar power.

Solar energy has its limits. Panels do not work well on cloudy days and stop working at night, so a battery is needed to store the power. The equipment can also be costly at the start, though it saves money in the long run. Still, because fuels like coal and petrol are running out, scientists believe that the sun will become our main source of energy in the future. A country like India, which receives bright sunshine for most of the year, is well placed to lead the way.

(i) Solar energy is: 1

(a) made from coal **(b)** harmful to the air
(c) free and clean **(d)** costly to produce daily

(ii) Solar panels turn sunlight into: 1

(a) electricity **(b)** water **(c)** petrol **(d)** oxygen

(iii) Why is a battery needed with solar panels? 1

(a) To store power for night and cloudy days **(b)** To clean the panels
(c) To make the panels heavier **(d)** To cool the sun

(iv) State whether True or False: Solar panels work well at night. 1

(a) True **(b)** False

(v) India is well placed for solar power because it: 1

(a) has long rivers **(b)** gets bright sunshine most of the year
(c) has many mountains **(d)** has cheap coal

(vi) Why does solar energy not pollute the air? 1

(vii) Mention two uses of solar energy given in the passage. 1

(viii) What are the two limits of solar energy mentioned? 1

(ix) Find a word in the passage that means 'to take hold of or collect'. 1

(x) Why do scientists believe the sun will be our main source of energy in the future? 1

SECTION — B (Reading Comprehension: Story / Poem) — 10 Marks

Read the text and answer the questions.

2. *Read the poem and answer the questions that follow.* — 10

A Seed's Dream

Under the earth, in a quiet bed,
A tiny seed lay sleeping;
It dreamt of the sky and the singing birds
While the cold dark rain was weeping.

"Oh, when shall I see the light?" it said,
"When will my roots grow strong?"
The worm said, "Wait," and the soil said, "Wait,"
"It won't be very long."

One day the sun came warm and bright,
And the seed gave a little shiver;
It pushed a green head through the ground
And stood by the shining river.

Now it is a tree with a hundred arms
And a nest in every one;
It tells the seeds beneath the earth,
"Just wait for the morning sun."

(i) Where was the seed sleeping? — 1

(a) In a nest **(b)** In a river
(c) Under the earth **(d)** On a tree

(ii) The worm and the soil told the seed to: — 1

(a) hurry **(b)** go away
(c) sleep forever **(d)** wait

(iii) What made the seed come out of the ground? — 1

(a) A strong wind **(b)** The moon
(c) A farmer **(d)** The warm bright sun

(iv) State whether True or False: The seed grew into a tree with nests in its branches. — 1

(a) True **(b)** False

(v) The central message of the poem is: — 1

(a) seeds are small **(b)** rain is cold
(c) trees are tall **(d)** patience brings success

(vi) What did the seed dream about? — 1

(vii) Pick out a pair of rhyming words from the second stanza. — 1

(viii) What does the tree tell the seeds beneath the earth? — 1

(ix) What does 'a tree with a hundred arms' mean? — 1

(x) How can we say that the tree is useful to birds? — 1

END OF QUESTION PAPER — Total: 20 Marks
