THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — MATHS CHAPTER TEST SET A

Chapter 5: **Parallel and Intersecting Lines** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat figures wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The complement of 25° is: 1

(a) 115° **(b)** 155° **(c)** 65° **(d)** 25°

2. The complement of 73° is: 1

(a) 73° **(b)** 107° **(c)** 163° **(d)** 17°

3. The supplement of 118° is: 1

(a) 62° **(b)** 242° **(c)** 28° **(d)** 118°

4. Two lines intersect and one angle is 40°. The vertically opposite angle is: 1

(a) 50° **(b)** 280° **(c)** 40° **(d)** 140°

5. In a linear pair, one angle is 50°. The other is: 1

(a) 130° **(b)** 40° **(c)** 310° **(d)** 50°

6. A transversal cuts two parallel lines. A corresponding angle to 48° is: 1

(a) 132° **(b)** 42° **(c)** 48° **(d)** 96°

7. A transversal cuts parallel lines. If an alternate interior angle is 58°, its pair is: 1

(a) 122° **(b)** 68° **(c)** 58° **(d)** 32°

8. Two lines in a plane that never meet are called: 1

(a) transversals **(b)** perpendicular lines
(c) intersecting lines **(d)** parallel lines

9. Vertically opposite angles are always: 1

(a) equal **(b)** complementary **(c)** supplementary **(d)** unequal

10. An angle greater than 90° and less than 180° is: 1

(a) obtuse **(b)** reflex **(c)** acute **(d)** right

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Define parallel and intersecting lines. 2

12. State the vertically opposite angle property. 2

13. Find the complement and supplement of 35°. 2

14. What is a linear pair? Give its measure. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Two lines intersect so that one angle is 4x and the adjacent angle is 5x. Find all four angles. 3

16. A transversal cuts two parallel lines. A corresponding angle is 65°. Find all eight angles' values. 3

17. Find x if corresponding angles are (3x + 10)° and (5x − 30)° and lines are parallel. 3

OR

If a transversal cuts two lines and alternate angles are 72° and 72°, what do you conclude? 3

18. Explain how to draw a line through P parallel to a given line using ruler and set square. 3

OR

Two co-interior angles are (2x + 15)° and (3x + 5)°. If lines are parallel, find x. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. (i) Define a transversal. 5
(ii) Name the angle pairs formed.
(iii) If a corresponding angle is 75°, find the other seven angles.

OR

Case study: Two roads AB and CD are parallel and a road EF crosses them. At A the angle ∠EAB = 68°. 5
(i) Find the angle at C corresponding to it.
(ii) Find the alternate angle.
(iii) Find the co-interior angle.
(iv) Are AB and CD parallel? Why?

20. (i) Find x: angles (4x − 10)° and (2x + 30)° are alternate on parallel lines. 5
(ii) Find the angles.
(iii) Find their co-interior angles.

OR

(i) Prove that a linear pair sums to 180°. 5
(ii) Find the angles if one is 40° more than the other.
(iii) Name each.

END OF QUESTION PAPER — Total: 40 Marks
