THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SCIENCE CHAPTER TEST SET B

Chapter 4: **Changes Around Us: Physical and Chemical** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A change in which new substances are formed is a: 1

(a) physical change **(b)** reversible change only
(c) temporary change only **(d)** chemical change

2. Which of these is a physical change? 1

(a) Dissolving sugar in water **(b)** Rusting nails
(c) Curdling milk **(d)** Burning wood

3. The lowest temperature at which a substance catches fire is its: 1

(a) boiling point **(b)** room temperature
(c) ignition temperature **(d)** melting point

4. Milk turning into curd is a: 1

(a) reversible change **(b)** chemical change
(c) physical change **(d)** evaporation

5. Which is an irreversible change? 1

(a) Burning of coal **(b)** Stretching a rubber band
(c) Folding paper **(d)** Melting of ice

6. When vinegar is added to baking soda we see: 1

(a) a solid ring only **(b)** no change
(c) bubbles of gas **(d)** colour of litmus

7. The change in which a metal gets a green coating is: 1

(a) dissolving **(b)** melting
(c) corrosion (chemical change) **(d)** freezing

8. Condensation of water vapour is a: 1

(a) combustion **(b)** physical change **(c)** rusting **(d)** chemical change

9. Boiling water to make steam is: 1

(a) combustion **(b)** rusting
(c) a chemical change **(d)** a physical change

10. To put out a fire in an oil pan, we should: 1

(a) add more oil **(b)** blow on it
(c) pour water **(d)** cover it to stop air

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 15–25 words each.

11. Why is rusting called a chemical change? 2

12. State two examples of physical changes. 2

13. Name two examples of chemical changes in the kitchen. 2

14. What is crystallisation? Is it a physical or chemical change? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe what happens when a candle burns, pointing out physical and chemical changes. 3

16. Describe how fire can be controlled. 3

17. Give three examples each of reversible and irreversible changes. 3

OR

Why do some changes happen slowly? Give examples. 3

18. Why is food spoilage an undesirable change? How can we prevent it? 3

OR

What is the role of oxygen in combustion? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–120 words each.

19. (i) Explain rusting and what is needed. 5
(ii) Describe an experiment.
(iii) State methods of prevention.

OR

(i) Describe five changes around us and classify them. 5
(ii) State whether they are desirable or not.

20. **Case study:** Priya mixes vinegar with baking soda and passes the gas through lime water. 5
(i) What do you see?
(ii) Name the gas.
(iii) What happens to lime water?
(iv) Is it a chemical change?

OR

(i) Why do some changes occur only with heat? 5
(ii) Give examples.
(iii) What is ignition temperature?

END OF QUESTION PAPER — Total: 40 Marks
