THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 7 — SCIENCE CHAPTER TEST SET A

Chapter 9: **Life Processes in Plants** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Green plants prepare their own food by the process of: 1

(a) respiration **(b)** digestion **(c)** transpiration **(d)** photosynthesis

2. Stomata are surrounded by: 1

(a) root cells **(b)** bark cells **(c)** phloem cells **(d)** guard cells

3. Extra glucose in plants is stored as: 1

(a) salt **(b)** cellulose only **(c)** starch **(d)** protein

4. Water and minerals are carried upward by the: 1

(a) phloem **(b)** xylem **(c)** cambium only **(d)** stomata

5. Transpiration helps in: 1

(a) making seeds
(b) making food
(c) making flowers
(d) pulling water upward and cooling the plant

6. An insectivorous plant is: 1

(a) maize **(b)** pitcher plant **(c)** coconut **(d)** mango

7. Which nutrient do insectivorous plants get from insects? 1

(a) calcium **(b)** nitrogen **(c)** oxygen **(d)** carbon

8. Which structure opens and closes stomata? 1

(a) xylem **(b)** petiole **(c)** veins **(d)** guard cells

9. Which is a mode of nutrition in which an organism feeds on another living organism? 1

(a) autotrophic **(b)** photosynthetic **(c)** saprotrophic **(d)** parasitic

10. The petiole of a leaf is: 1

(a) the root **(b)** the leaf tip
(c) the stalk joining leaf to stem **(d)** the flower

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 15–25 words each.

11. What is photosynthesis? 2

12. Write the equation of photosynthesis in words. 2

13. What are stomata? Give one function. 2

14. What is the role of chlorophyll? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe the structure of a leaf that helps photosynthesis. 3

16. Explain how stomata work. 3

17. Describe an experiment to show that sunlight is necessary for photosynthesis. 3

OR

Why is photosynthesis important for life on Earth? 3

18. Explain transport of water and minerals in plants. 3

OR

Explain transport of food in plants. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–120 words each.

19. (i) Define photosynthesis.
(ii) Name the raw materials and products.
(iii) Where does it occur? 5

OR

Case study: A student covers a part of a leaf with black paper for two days, then tests it for starch. 5
(i) Aim?
(ii) Why remove chlorophyll?
(iii) Observation?
(iv) Conclusion?

20. (i) Describe the structure of stomata.
(ii) Role of guard cells.
(iii) Importance of stomata. 5

OR

Case study: Plants A, B, C: A in sun with water, B in sun without water, C in dark with water. 5
(i) Which grows best?
(ii) Why does B fail?
(iii) Why does C fail?
(iv) Conclude.

END OF QUESTION PAPER — Total: 40 Marks
