CLASS 7 — SCIENCE FULL SYLLABUS PAPER SET 07

Full Syllabus (Chapters 1–11) | RBSE Pattern | Session 2026–27

Time: 3 Hours 15 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 80**

General Instructions:

1. All questions are compulsory.
2. Q. 1–20 are Objective Type (1 mark each).
3. Q. 21–28 are Very Short Answer Type (2 marks each).
4. Q. 29–36 are Short Answer Type (3 marks each).
5. Q. 37–40 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 35 to 40.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 20 × 1 = 20

Choose the correct option and write it in your answer book.

1. Indigestion is caused by excess: 1

(a) water in the stomach **(b)** acid in the stomach
(c) salt in food **(d)** base in the stomach

2. Cabbage juice is used as an indicator because it: 1

(a) is neutral **(b)** has no colour
(c) changes colour with acids and bases **(d)** is sweet

3. The thin wire inside a bulb that glows is the: 1

(a) filament **(b)** switch **(c)** electrode **(d)** terminal

4. Which of the following is a conductor? 1

(a) Rubber **(b)** Plastic scale **(c)** Dry wood **(d)** Copper wire

5. Non-metal used to disinfect wounds as tincture: 1

(a) iodine **(b)** sulfur **(c)** carbon **(d)** phosphorus

6. A method to prevent rusting is: 1

(a) painting or galvanising **(b)** leaving iron wet
(c) sprinkling salt **(d)** heating iron

7. Melting of ice is a: 1

(a) combustion **(b)** chemical change **(c)** rusting **(d)** physical change

8. Burning of LPG in a stove is: 1

(a) a physical change **(b)** a chemical change
(c) evaporation **(d)** boiling

9. Which of these is common to both boys and girls in adolescence? 1

(a) Hoarse voice only **(b)** Growth of hair in armpits
(c) Beard **(d)** Moustache

10. Used sanitary pads should be: 1

(a) thrown in a river
(b) wrapped in newspaper and put in a dustbin
(c) flushed down the toilet
(d) left outdoors

11. Heat transfer in liquids and gases mainly takes place by: 1

(a) convection **(b)** radiation **(c)** conduction **(d)** refraction

12. The heating of a metal spoon in hot tea is by: 1

(a) conduction **(b)** convection **(c)** sublimation **(d)** radiation

13. The device used to measure speed in a vehicle is the: 1

(a) odometer **(b)** barometer **(c)** thermometer **(d)** speedometer

14. The motion along a straight line is called: 1

(a) linear motion **(b)** periodic motion **(c)** circular motion **(d)** random motion

15. The large intestine absorbs: 1

(a) fats **(b)** starch

(c) water and some salts **(d)** proteins

16. Adult frogs breathe through lungs and: 1

(a) gills only **(b)** stomata **(c)** skin **(d)** spiracles

17. Loss of water vapour from leaves is called: 1

(a) transpiration **(b)** photosynthesis **(c)** germination **(d)** respiration

18. Before testing a leaf for starch, chlorophyll is removed using: 1

(a) lime water **(b)** warm alcohol **(c)** salt solution **(d)** cold water

19. The image in a pinhole camera is formed on a: 1

(a) pinhole **(b)** lens **(c)** screen **(d)** mirror

20. The Moon's same face always faces the Earth because it: 1

(a) rotates and revolves in the same time **(b)** is flat

(c) does not revolve **(d)** does not rotate

SECTION — B (Very Short Answer Type) 8 × 2 = 16

Answer in about 15–25 words each.

21. How do farmers treat acidic soil? 2

22. What are the terminals of a cell? 2

23. Which non-metal is a good conductor? Where is it used? 2

24. Why should one be careful while using social media? 2

25. What are aquifers? 2

26. State the relation between distance, speed and time. 2

27. How do we prove exhaled air has more carbon dioxide? 2

28. What are parasitic plants? Give an example. 2

SECTION — C (Short Answer Type) 8 × 3 = 24

Answer in about 40–60 words each.

29. A battery is made of 3 cells of 1.5 V in series. What is its total voltage? 3

30. Explain why bursting crackers is called a chemical change. 3

31. Why do glaciers melt faster with higher temperature? 3

32. Why do we feel hungry again even after eating? Relate to digestion. 3

33. Why is the Sun's light able to reach Earth although there is no air in space? 3

34. What is the importance of the Sun to Earth? 3

35. Why is toothpaste basic? How does it protect teeth? 3

OR

How can we make a household olfactory indicator and what do we observe? 3

36. What is the role of the petiole and veins in a leaf? 3

OR

Differentiate photosynthesis and respiration in plants. 3

SECTION — D (Long Answer Type) 4 × 5 = 20

Answer in about 80–120 words each.

37. (i) State five physical properties of metals. 5
(ii) Explain each briefly.
(iii) Give one use for each.

OR

Case study: A farmer finds that his iron plough rusts, while his brass pot and copper wire are green. 5
(i) What is rusting?
(ii) What is the green coating?
(iii) How can he protect the plough?
(iv) Why is brass a better metal for the pot?

38. (i) What is personal hygiene? 5
(ii) Why is it vital in adolescence?
(iii) Menstrual hygiene steps.

OR

(i) Explain the menstrual cycle in brief. 5
(ii) What are common myths?
(iii) How can we remove them?

39. (i) Convert 108 km/h and 25 m/s. 5
(ii) Which is faster?
(iii) How far in 10 s at the faster speed?

OR

(i) Distinguish between uniform and non-uniform motion with examples. 5
(ii) Draw distance–time graph shapes (describe).
(iii) Why is average speed needed?

40. (i) What is lateral inversion? 5
(ii) Why on an ambulance?
(iii) Another example of its use.

OR

MASTERMIND

Case study: Light from the Sun forms a round spot below a tree through gaps between leaves. 5

(i) Why round?

(ii) Which device works similarly?

(iii) Would size change with gap?

(iv) What does this show about light?

END OF QUESTION PAPER **Total: 80 Marks**
