THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE CHAPTER TEST SET A

Chapter 2: **The Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Organisms too small to be seen with the unaided eye are called: 1

(a) macroorganisms **(b)** minerals **(c)** vertebrates **(d)** microorganisms

2. The outer boundary of an animal cell is the: 1

(a) cell membrane **(b)** chloroplast **(c)** cell wall **(d)** nucleoid

3. A bacterial cell lacks a well-defined: 1

(a) cytoplasm **(b)** cell wall **(c)** nucleus **(d)** cell membrane

4. Which organisms are always multicellular? 1

(a) yeast only **(b)** viruses only
(c) plants and animals **(d)** bacteria and protozoa

5. Cell shape is related to its: 1

(a) name **(b)** function
(c) age of the person **(d)** colour

6. Curd is formed from milk by the action of: 1

(a) Amoeba **(b)** Rhizobium **(c)** yeast **(d)** Lactobacillus

7. Spirulina is a: 1

(a) microalga used as food supplement **(b)** protozoan
(c) virus **(d)** fungus

8. Viruses differ from other microorganisms because they: 1

(a) have a nucleus **(b)** make food
(c) are very large **(d)** reproduce only inside a host organism

9. Plant, fungal and bacterial cells all have: 1

(a) a true nucleus **(b)** centrioles **(c)** a cell wall **(d)** chloroplasts

10. Which cell part has a ‘green pigment’ for photosynthesis? 1

(a) cytoplasm **(b)** chlorophyll in chloroplasts
(c) nucleus **(d)** cell wall

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Name the three basic parts of a typical cell. 2

12. State two differences between a plant cell and an animal cell. 2

13. What is a nucleoid? In which cells is it found? 2

14. Give two examples of unicellular organisms. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Draw the labelled structure of a typical animal cell and name three parts. 3

16. Compare plant, animal and bacterial cells by listing one feature found only in each. 3

17. Explain with an activity how yeast produces gas from sugar. 3

OR

Write three uses of microorganisms in daily life. 3

18. Explain how legume roots and Rhizobium help each other. 3

OR

Describe how biogas is made and used. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. Draw and label a plant cell. Write the functions of any three labelled parts. 5

OR

Compare plant, animal and bacterial cells in a table of at least five points. 5

20. Explain the levels of organisation in a human body from cell to organism with examples. 5

OR

Describe the yeast activity with two test tubes A and B. Write the set-up, observation and conclusion. 5

END OF QUESTION PAPER — Total: 40 Marks

MASTERMIND
