THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE TWO-CHAPTER TEST SET A

Chapters 1 & 2: **Exploring the Investigative World of Science, The Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The thing that we deliberately change in an experiment is the: 1

(a) result we observe **(b)** variable we control
(c) unit of measurement **(d)** conclusion

2. A numerical observation in the puri study is: 1

(a) whether it puffs **(b)** whether it smells
(c) whether oil splatters **(d)** time taken to puff up

3. The idea of changing and observing step by step to answer a question is called: 1

(a) copying **(b)** random guessing
(c) systematic investigation **(d)** memorising

4. Using atta in one trial and maida in another changes the: 1

(a) type of flour **(b)** time of day **(c)** oil temperature **(d)** size of dough

5. Grade 8 science combines wonder and evolution into: 1

(a) investigation **(b)** recitation **(c)** memorisation **(d)** copying

6. The part of a cell that controls its activities and holds genetic material is the: 1

(a) cell wall **(b)** nucleus **(c)** vacuole **(d)** cell membrane

7. Chloroplasts are present in: 1

(a) red blood cells **(b)** plant cells **(c)** bacterial cells **(d)** animal cells

8. Which is a unicellular organism? 1

(a) Mushroom cap only **(b)** Human
(c) Amoeba **(d)** Mango tree

9. A group of similar cells doing a common function is a: 1

(a) tissue **(b)** nucleus **(c)** organ **(d)** organism

10. Yeast is used in making: 1

(a) biogas **(b)** bread and idli **(c)** vaccine only **(d)** curd

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Give two examples of scientific questions. 2

12. Why is 'which puri looks nicest?' not a good scientific question? 2

13. Why are viruses different from bacteria? 2

14. What is Spirulina and why is it useful? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. Give one example each of a yes/no observation and a measurement observation in an investigation on how fast sugar dissolves. 3

16. A student sees a cell with a cell wall and chloroplasts. Identify the cell and give two reasons. 3

17. A student says 'hot oil makes puris puff better' without trials. Explain what is missing. 3

OR

Write the meaning of root and kite symbols used in the book. 3

18. Why are fermentation products like idli and dosa soft? 3

OR

State any three differences between bacteria and fungi. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. A student claims that hotter oil always makes a puri puff faster. 5
(i) How would you test it?
(ii) What results would support the claim?
(iii) What would you do if results disagree?

OR

Explain why science is called an evolving subject using the puri example and the Grade 7 idea. 5

20. Describe how Rhizobium increases soil fertility and why legumes are grown in crop rotation. 5

OR

Discuss harmful and beneficial effects of microorganisms with three examples each. 5

END OF QUESTION PAPER — Total: 40 Marks
