THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE TWO-CHAPTER TEST SET B

Chapters 1 & 2: **Exploring the Investigative World of Science, The Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The first calendars were helped by watching the: 1

(a) phases of the Moon **(b)** colour of leaves
(c) wind direction **(d)** tides of rivers

2. Earth lies at a distance from the Sun where water: 1

(a) is always ice **(b)** can remain liquid
(c) is always steam **(d)** is absent

3. A prediction in science is: 1

(a) a final law
(b) a testable expectation about what will happen
(c) a rumour
(d) a proven fact

4. Oil temperature is best measured with a: 1

(a) ruler **(b)** thermometer **(c)** stopwatch **(d)** beam balance

5. Which activity shows scientific attitude? 1

(a) Checking claims with observation **(b)** Copying answers
(c) Believing everything **(d)** Ignoring evidence

6. Rhizobium helps the soil by: 1

(a) removing water **(b)** fixing atmospheric nitrogen
(c) adding sand **(d)** making soil acidic

7. The main gas in biogas used as fuel is: 1

(a) chlorine **(b)** helium **(c)** oxygen **(d)** methane

8. The instrument used to see microorganisms is: 1

(a) spring balance **(b)** microscope **(c)** telescope **(d)** thermometer

9. Which one of these is NOT beneficial in the way listed? 1

(a) Rhizobium fixing nitrogen **(b)** Lactobacillus making curd
(c) Yeast making bread **(d)** Rhizobium causing curd formation

10. A large central vacuole is more prominent in: 1

(a) animal cells **(b)** plant cells **(c)** red blood cells **(d)** viruses

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 10–15 words each.

11. What new questions may arise after the first puri experiment? 2

12. How did watching the Moon help humans? 2

13. Define decomposers. Give one example. 2

14. What is biogas? Name its main gas. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. How can you test whether the way of dropping dough matters? Write the plan. 3

16. Explain how Spirulina can address food needs. 3

17. Why should experiments be done safely? Give two precautions while frying. 3

OR

State how Grade 6, 7 and 8 books of Curiosity differ in their message. 3

18. Why do the cells of a multicellular organism have different shapes? Give two examples. 3

OR

Write any three precautions when using a microscope to view a slide. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. Describe three different ways an investigator may change dough when studying puri puffing and what to observe for each. 5

OR

List five habits of a good young scientist and explain any two. 5

20. A student observes pond water under a microscope. Predict what she may see and how she should prepare the slide. 5

OR

Explain how decomposers keep the environment clean and what would happen without them. 5

END OF QUESTION PAPER — Total: 40 Marks
