THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE TWO-CHAPTER TEST SET C

Chapters 1 & 2: **Exploring the Investigative World of Science, The Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. In the puri-puffing study, the time taken to puff up is: 1

(a) something we keep fixed **(b)** the question
(c) an opinion **(d)** something we measure

2. To test the effect of oil temperature on puffing, the dough circles should have: 1

(a) different thickness **(b)** the same thickness
(c) different sizes **(d)** different flour each time

3. According to the chapter, a simple kitchen can be: 1

(a) unsuitable for science **(b)** a place only for cooking
(c) a place for scientific observation **(d)** a laboratory only for adults

4. Dropping dough vertically or at an angle changes the: 1

(a) mass of the pan **(b)** type of flour
(c) way the dough enters the oil **(d)** colour of oil

5. The root image on left-hand pages symbolises: 1

(a) a deep foundation of knowledge and heritage
(b) a fruit
(c) fast travel
(d) a game

6. The jelly-like material inside a cell is the: 1

(a) cytoplasm **(b)** cell wall **(c)** nucleus **(d)** chloroplast

7. Which part makes plant cells green? 1

(a) nucleus **(b)** chloroplast **(c)** cell wall **(d)** vacuole

8. Which group has both unicellular and multicellular members? 1

(a) bacteria **(b)** fungi **(c)** protozoa **(d)** animals

9. The heart is an example of an: 1

(a) tissue **(b)** organ **(c)** cell **(d)** organelle

10. The gas released by yeast during fermentation of sugar is: 1

(a) oxygen **(b)** nitrogen **(c)** carbon dioxide **(d)** hydrogen

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 10–15 words each.

11. Why is repeating an experiment useful? 2

12. Distinguish between an observation and a prediction. 2

13. State why cells differ in shape. 2

14. What is the function of the cell wall? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 30–40 words each.

15. What role does measurement play in investigations? 3

16. Explain the term ‘fermentation’ with one use. 3

17. Why does the book end with Earth and climate? 3

OR

Suggest two questions about the Moon that can be investigated by observing the sky. 3

18. Who was Robert Hooke and what did he observe? 3

OR

Why is the cell called the unit of life? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 80–100 words each.

19. Explain the difference between an opinion and a scientific statement with two examples each. 5

OR

An experiment on dissolving sugar in water at 20 °C, 40 °C and 60 °C is planned. Identify the variable, the observation, and three fixed factors and explain how to make it fair. 5

20. Describe the structure of a bacterial cell and explain why it is called ‘prokaryotic’ type in simple terms. 5

OR

Describe the contribution of Ananda Mohan Chakrabarty and discuss how microbes help in cleaning the environment. 5

END OF QUESTION PAPER — Total: 40 Marks
