CLASS 8 — SCIENCE TWO-CHAPTER TEST SET D

Chapters 1 & 2: **Exploring the Investigative World of Science, The Invisible Living World: Beyond Our Naked Eye** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Draw neat, labelled diagrams wherever required.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The Moon appears to shrink after purnima because: 1

(a) the Moon gets smaller **(b)** the Sun goes out
(c) Earth blocks all light **(d)** a smaller lit part is visible from Earth

2. Human activity can disturb Earth's: 1

(a) climate patterns **(b)** size of Moon
(c) spin direction only **(d)** distance from Sun

3. Repeating an experiment several times makes results more: 1

(a) hidden **(b)** reliable **(c)** colourful **(d)** random

4. Even the simple puffing of a puri is: 1

(a) impossible to observe **(b)** not completely understood by scientists
(c) untestable **(d)** fully solved

5. The Shaka era calendar shown in the chapter is an example of a: 1

(a) circuit diagram **(b)** recipe
(c) calendar based on sky observations **(d)** map

6. Microorganisms that break down dead plants and animals are: 1

(a) producers **(b)** decomposers **(c)** predators **(d)** herbivores

7. The scientist who developed oil-eating bacteria is: 1

(a) Edward Jenner **(b)** Ananda Mohan Chakrabarty
(c) Robert Hooke **(d)** Louis Pasteur

8. Who first described cells in a slice of cork? 1

(a) Robert Hooke **(b)** Alexander Fleming
(c) Louis Pasteur **(d)** Edward Jenner

9. Microorganisms can live: 1

(a) only in water
(b) almost everywhere, even inside other organisms
(c) only in soil
(d) only in air

10. Which pair is correctly matched? 1

(a) Rhizobium – bread **(b)** Yeast – nitrogen fixation
(c) Amoeba – biogas **(d)** Lactobacillus – curd

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 10–15 words each.

11. Why must a measured number be written with its unit? 2

12. Why is the kitchen a good place to start doing science? 2

13. Mention two ways microorganisms are harmful. 2

14. What did Ananda Mohan Chakrabarty develop? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 30–40 words each.

15. Compare a fair test and an unfair test using an example. 3

16. Give three examples of harmful effects of microorganisms. 3

17. Why are ecosystems important enough to be studied in this book? 3

OR

Give three examples of investigations a student can do at home. 3

18. How is a cell like a small factory? Explain with three parts. 3

OR

Match each to its role: yeast, Lactobacillus, Rhizobium. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 80–100 words each.

19. How does the chapter use the example of the puri to show that experiments in the kitchen are real science? Write a short paragraph. 5

OR

Why is climate change an example of a problem that needs the scientific method? Write three points. 5

20. Distinguish viruses from other microorganisms and explain why they cannot be called completely living cells. 5

OR

Design a poster plan listing five uses of microorganisms with one line on each. 5

END OF QUESTION PAPER Total: 40 Marks
